

What You Need to Know About Mountain-Bracing Bolt in Genshin Impact

Is Mountain-Bracing Bolt useful for your exploration in Genshin Impact? This article will provide you with everything you need to know about Mountain-Bracing Bolt in Genshin Impact.

The Mountain-Bracing Bolt is a 4-star, event-exclusive weapon in Genshin Impact, introduced in version 5.1. It can only be obtained through Weapon Banner pulls and is not available in the Standard Banner. Despite being a 4-star weapon, it provides both Energy Recharge and Elemental Skill DMG boosts, making it a solid choice for 4-star weapon characters who rely heavily on Elemental Skills for damage.

Mountain-Bracing Bolt Stats and Uses in Genshin Impact

At level 90 and tweaked level 1, the Mountain-Bracing Bolt has the following stats:

Basic Attack	565
Secondary attack	30.6% energy recharge
Weapon Passivity	The weapon wielder will have 15% reduced climbing stamina consumption and 12% increased Elemental Skill damage. Additionally, after other party members use their Elemental Skills, the character wielding this weapon will receive an additional 12% Elemental damage boost lasting 8 seconds.

With these stats, the Mountain-Bracing Bolt is ideal for characters who deal damage primarily through their Elemental Skills. Therefore, characters with weapons with below-average DPS can effectively use this 4-star weapon. If you upgrade the Mountain-Bracing Bolt to Refinement Level 5, the Elemental Skill damage for the character wielding this weapon will increase by 24%. This can be further enhanced by 24% when other party members use their Elemental Skills.

How to get Mountain-Bracing Bolt in Genshin Impact

The Mountain-Bracing Bolt is an event exclusive weapon introduced in Genshin Impact 5.1. It is currently featured on the weapon banner during the first phase of this version, along with several other 4-star weapons. This phase will end on October 29, 2024, and after that date, the Mountain-Bracing Bolt will not be available.

Best Mountain-Bracing Bolt User

Mountain-Bracing Bolt is a great weapon for both on-field and off-field DPS characters who focus on using their Elemental Skills to deal damage. Currently, there are two characters who can fully utilize the Mountain-Bracing Bolt:

Kachina

The Mountain-Bracing Bolt is a great choice for the 4-star Geo character Kachina. She can even be seen using this weapon in the Natlan Archon Quest cutscene. Kachina's main damage comes from Turbo Twirly, which is part of her Elemental Skill. Equipping the Mountain-Bracing Bolt will greatly increase her elemental damage output and help with her need to recharge her Energy.

Emily

Emily is an effective off-field DPS supporting character who relies heavily on her Elemental Skills and Elemental Reactions to deal damage. Equipping Emily with Mountain-Bracing Bolt allows her to deal significant additional damage when using her Elemental Skills. Since she primarily operates off-field, you can keep your DPS characters on the enemy, increasing the overall damage output of the entire team.
