

What's new about the Huawei Watch GT 2e 'watch battery'?

The shortened version of Watch GT 2 is the option for those who prefer a good workout smartwatch at an affordable price, but still equipped with many outstanding features with an impressive battery life of up to 14 days.

Design

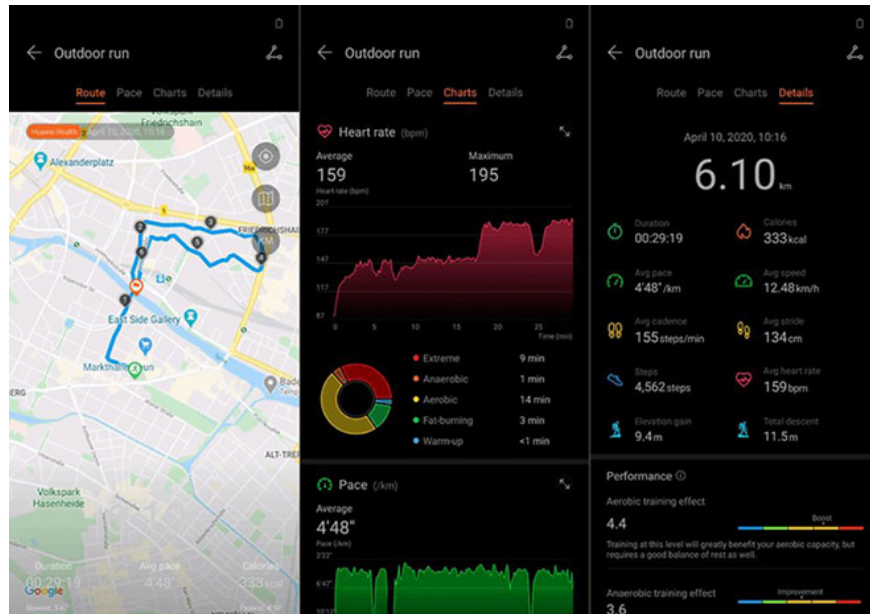

Watch GT 2e has a sporty design with a round face and slimmer buttons. The stainless steel case surrounds the flat control knob, while the soft rubber strap is skin-friendly and the TPU material fits the monolithic design. The watch is exceptionally breathable and sweat resistant. The result is a comfortable feel for exercise and additional water resistance of up to 5 ATM.

The 1.39 inch OLED touch screen is sharp and bright for good resolution. It is easy to read even in sunlight. There are many digital clock designs for users to choose from.

Software

Huawei's Lite OS continues to be used on Watch GT 2e. The problem is, everything is managed by the Huawei Health app - the source of the problem if the user connects to a smartphone outside of the Huawei ecosystem. To use Huawei Health, users need Huawei AppGallery 4.0 to have the latest HMS Core.

When this is met, users can pair the Watch GT 2e with other Android smartphones that are not Huawei's. While this is easy to handle, it can be a bit difficult for users, usually pairing with another Android phone Huawei takes about 10 minutes.

Huawei Health app offers many good workout features

In return, Huawei Health is an impressive fitness tracking tool with 15 professional workout modes available for Watch GT 2e, including triathlons, pool swimming and cycling. Despite the limitations, tests show the Watch GT 2e and GPS are fairly accurate on popular routes and run regularly. The heart rate monitor is also accurate. The Watch GT 2e can also measure VO2Max levels, although this can only be measured during running training sessions. Blood oxygen saturation (SpO2) levels were also recorded.

Hardware

The Watch GT 2e comes with Huawei's Kirin A1 chip and 4 GB of RAM, which makes the experience of navigating and navigating menus very interesting on a small 1.39 inch screen.

The battery on Watch GT 2 is capable of lasting performance

Battery life is one of the Watch GT 2's strengths and its capacity remains unchanged on the Watch GT 2e when it reaches 455 mAh promising up to 14 days of use. But if you use your watch to its full potential, the number will be shorter, for example using a watch to track GPS during exercise is one of the fastest ways to drain your battery. The testing process shows that the battery life can basically be used over 7 days if used regularly. Charging is done via the included charging pad, which clamps the back of the smartwatch tightly.

Battery charging is done via charging pad

With the aforementioned factors, the Watch GT 2e is clearly a prominent smartwatch in terms of battery life and features to compete with rivals, especially for those who prefer a strong workout smartwatch. Especially, if compared to the price of other competitors, Watch GT 2e is having a softer price when offered for 4.49 million dong.

In addition, in Vietnam market, when users order Watch GT 2e from 22 to 31 May, they will receive an additional gift package worth about VND 1.6 million including Mozard wireless headphones and portable speakers. Bluetooth Speaker i6 Mini.
