

What's new in Bphone A40: The cheapest price in the A series, running a different chip every year

What's new in Bphone A40? How to configure Bphone A40? When was Bphone A40 released? How much does Bphone A40 cost? Let's find the answer through the article below!

Heard Rumor: Bphone A40 will have the cheapest price, get Google Play Protect certification and use MediaTek chip (continuously updated)

Based on the information shared by CEO Nguyen Tu Quang on October 27, BKAV promises to launch new products by the end of this year, including the Bphone A40 which is said to have the cheapest price. So what's new with Bphone A40? How to configure Bphone A40? When was Bphone A40 released? How much does Bphone A40 cost? Let's find the answer through the article below!

Note: The article will be updated continuously until Bphone A40 is officially launched, remember to follow the article every week!

BKAV will hire a 3rd party manufacturer to create Bphone A40 (updated: 30/10)

According to some information that I learned, BKAV confirmed that it will hire an ODM manufacturer to process Bphone A series in the future including A50, A60, A85 5G and of course Bphone A40. In a word, BKAV has switched to a new production method to reduce product prices and attract more users. New Bphone models including Bphone A40 will not be designed by the company itself, but ordered from an original equipment manufacturer.

If the information above is true, then I think the upcoming Bphone A Series will no longer have a personality design like the B series but follow the trend of the market, such as punch-hole cameras, water drops, . . Besides, the head of BKAV also thinks that Bphone A40 will be for ordinary users who need a powerful configuration device at a good price.

Although it is the same design and production stage, I believe that BKAV will still have certain interventions to create unique features for Bphone A series, such as BOS operating system, security features, camera and gesture manipulation. only. The quality control stage will also be performed by BKAV in the end, according to the share of

Configuration Bphone A40 will use MediaTek chip

Information about smartphone products from BKAV always attracts the attention and great attention of technology followers. In addition to the AirB and AirB Pro headsets, Bphone A40 , Bphone A50 , Bphone A60 and Bphone A85 5G will be released in December. Bphone A40 is probably the product with the most accessible price because of the configuration of a phone. cheap equipment.

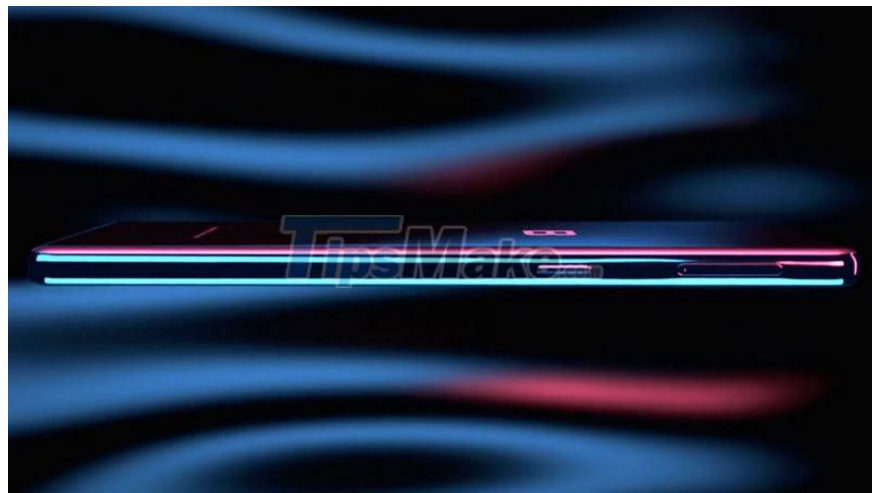

Specifically on the Geekbench scoring tool, a Bphone called Bphone A40 has been tested for single-core and multi-core performance of the processor and the chip mentioned here is MediaTek Helio G85. For those of you who do not know, this is a processor that was released in 2020 and we are not unfamiliar with this chip equipped on Xiaomi Redmi Note 9, Realme C25s,. Comes with This chip is the 4GB RAM capacity of Bphone A40.

BKAV Bphone A40	
Geekbench 5 Score	
343 Single-Core Score	1268 Multi-Core Score
Geekbench 5.4.1 for Android AArch64	
Result Information

System Information	
System Information	
Operating System	Android 11
Model	BKAV Bphone A40
Model ID	BKAV Bphone A40
Motherboard	mt89v1_64
CPU Information	
Name	ARM MT8769V/CZ
Topology	1 Processor, 8 Cores
Base Frequency	1.80 GHz
Cluster 1	8 Cores @ 1.80 GHz

According to the image above, the Bphone A40 achieved 343 single-core points, 1,268 multi-core points and I think these are quite modest numbers. If this information is correct, perhaps Bphone A40 will be BKAV's first product with a processor manufactured by MediaTek and I hope BKAV can better optimize this chip on Bphone A40 to devices with more powerful performance.

Bphone A40 gets Google Play Protect certification, the screen is enough to use

Another important information from Google Play service mentions that Bphone A40 will receive Google Play Protect certificate, this is a certification that some previous generations of Bphone did not have. Google Play Protect is built into the system and automatically scans the user's Android device and provides detailed information after scanning. This feature is quite important because it works to protect your device from malicious software.

Besides, I also found information that Bphone A40 will own a screen with HD + resolution (720 x 1,560 pixels). Although the size is not clear, I think the displayed image will be okay and enough to serve our basic needs.

When was Bphone A40 released? How much does Bphone A40 cost?

Bphone A40 is believed to be released in December 2021, and this is also the occasion when people go shopping a lot. More importantly, the price of Bphone A40 is expected to be very attractive, about 4 million VND. I believe this is a very attractive price for those who have never experienced Bphone and want to buy and try it.

So what do you think or expect from BKAV's upcoming smartphone?
