

What's new in iOS 14.4? When will it be released?

iOS 14.4 is the fourth major update to iOS 14, released in September last year, under which iOS 14.4 promises to be packed with a host of new features and improvements, and security patches. honey.

Remember in mid-December of last year Apple suddenly released iOS 14.4 beta 1 for registered users and developers. Beta 2 was released earlier this month.

1. When is iOS 14.4 released?

As usual, before releasing official iOS updates to users, Apple will release beta testers 1, 2 and 3 for developers and users who sign up for testing to find the bugs and fixes, and iOS 14.4 is no exception. Not long ago Apple suddenly released iOS 14.4 beta versions 1 and 2 for users to register for testing.

According to some sources, the official version of iOS 14.4 is expected to be released in late January or February this year.

2. What's new in iOS 14.4?

Apple does not disclose much information about the changes or new features in iOS 14.4. Most likely, the new iOS update will be added the feature to improve the HomePod mini speaker experience equipped with the U1 chip.

In addition, according to some users who registered to test iOS 14.4 beta 2, the new beta version also has the feature to warn users if it detects that the camera is not genuine, the device lock screen will display a message saying that can't verify iPhone has a genuine Apple camera.

This feature is essentially designed and works the same as the non-genuine battery warning feature, added on iPhone 11 devices.

3. How to update iOS 14.4

To update iOS 14.4, go to Settings => General (general settings) => Software Update (software update). Here check and update the latest iOS version available.

Above TipsMake has just reviewed you new features on iOS 14.4 as well as how to update to the latest iOS version.
