

WhatsApp Account Verification Guide

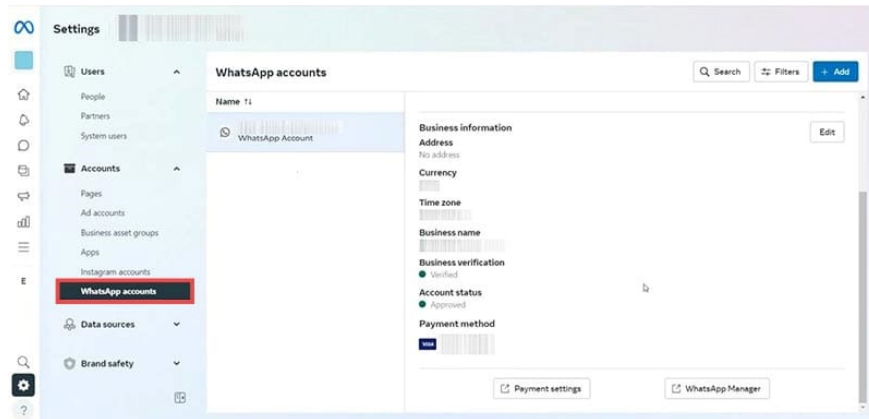

Just like Facebook verifies accounts, WhatsApp also supports users to verify personal accounts or community accounts.

Just like Facebook verifies accounts, WhatsApp also supports users to verify personal accounts or community accounts. Verified accounts will receive a green check mark next to the account name to know that this is an official account confirmed by Meta. Below are instructions for verifying WhatsApp accounts.

How to verify WhatsApp account

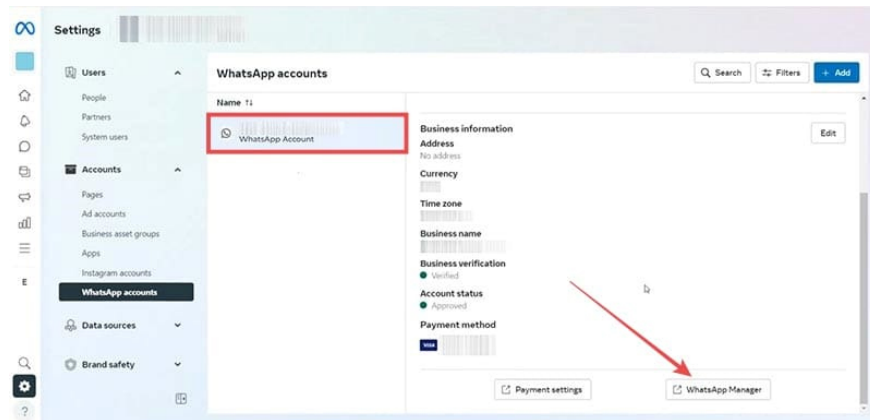

Step 1:

First you need to access **Meta Business Suite**, then click on **Accounts** and then select **WhatsApp Accounts** in the list on the left.

Step 2:

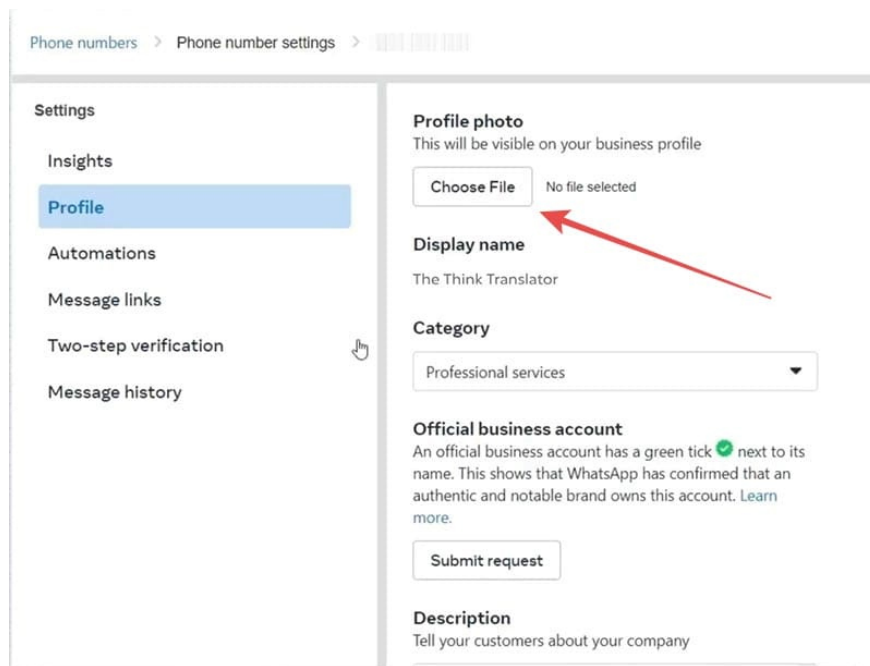

At this point, the user selects the **WhatsApp account they want to verify**, then clicks **WhatsApp Manager** to use it.

Step 3:

In WhatsApp Manager, you **enter the phone number of the account you want to verify** . Then, perform two-factor authentication of your WhatsApp account to confirm your identity.

We need to **fill in full account information** , choose a business avatar, choose the category in which your business operates. After filling in, **click Submit request** to send registration information.

Step 4:

Then display the interface to fill in additional information for the business WhatsApp account that we need to verify. Finally, **click Submit** to send your request to Meta.

Request official business account

Include information in your request to show that the brand your account represents is notable. [Learn more](#)

Prerequisites

- ✓ Business verification is complete.
- ✓ Profile display name is approved.
- ✓ Two-step verification is turned on.

Business website

Country of operation

Meta will review your request and make a decision within about a week. If your WhatsApp account is valid, you will be verified. If your request is unsuccessful, you can try again after 30 days.
