

# WhatsApp can become a web browser

According to the information of AndroidWorld page, after analyzing some of the code in the latest WhatsApp version, the experts discovered some commands that WhatsApp can add the ability to surf the web when using the application.

**According to the information of AndroidWorld page, after analyzing some of the code in the latest WhatsApp version, the experts discovered some commands that WhatsApp can add the ability to surf the web when using the application.**

WhatsApp surpasses 500 million global users

Neowin reiterated AndroidWorld's report that WhatsApp is currently mainly used for instant messaging (*OTT application form*), so adding the ability to surf the web will be very convenient for users.

WhatsApp is currently managed by Facebook, after the "social networking giant" spent \$ 19 billion to acquire. It is estimated that **WhatsApp** now has more than 500 million global users.

WhatsApp is the most cross-platform real-time messaging application that has the most supported version of mobile platforms: iOS, Android, Windows Phone, BlackBerry and Symbian.
