

Where to buy good bluetooth speakers?

Many of you also have the question of where to buy good and quality bluetooth speakers? HACOM will help you get information about buying bluetooth speakers at reputable sales addresses.

Speaker technology is always changing every day, every hour; especially for HiTech products. For audiophiles, choosing a bluetooth speaker is no exception. With changes in models, designs, quality, prices as well as reputable brands, it is always a difficult problem to choose. TipsMake will guide you on how to choose good bluetooth speaker models, as well as where to buy good bluetooth speakers in this article.

What kind of speaker is a bluetooth speaker?

Simply defined, a bluetooth speaker is understood as a wireless audio transmitter, receiving signals from computers (PC/ Laptop/ Desktop) or smartphone devices (Android/ iOS).

Bluetooth speakers are connected via Bluetooth signals between devices, can use separate chargers or plug directly into power sources or use batteries.

When entertaining, using wireless Bluetooth speakers will help limit tangled connection wires. No need to worry about complicated connection procedures or concerns about compatibility between devices.

What are the criteria for choosing a good bluetooth speaker?

1. The sound of the bluetooth speaker is good

This is the top criterion that customers who need to buy cheap mini bluetooth speakers or high-power bluetooth speakers are interested in.

A good cheap Bluetooth speaker is considered to be of good quality if it can reproduce full, clear bass and treble. Especially when used with a high-power Bluetooth speaker, the speaker does not have distortion.

Therefore, in the process of searching for options to buy cheap bluetooth speakers, you should choose and compare many speaker lines together, test with many music genres to have an overview of each product.

2. Bluetooth speakers have quick connections with devices

One detail when choosing to buy a cheap bluetooth speaker that many people often ignore is testing the speaker's ability to connect to devices. Even though it is just a cheap mini bluetooth speaker, being able to support many connection ports will definitely make it more convenient for you to use every day. That way, you don't need to use an additional conversion cable and can still connect directly to any device.

3. The power of the bluetooth speaker is good and stable

The higher the power of a bluetooth speaker, the louder and clearer the sound. Currently on the market, bluetooth speaker models are sold with a capacity from 2W to about more than 10W. You can choose to buy a high-power bluetooth speaker or a mini bluetooth speaker with a small capacity depending on the purpose of use.

4. Portable Bluetooth Speaker

The main purpose of customers when choosing to buy bluetooth speakers is to make it more convenient to move. Therefore, when choosing to buy, you should check whether it suits your needs or not, and what the weight is.

So a heavy bluetooth speaker is definitely not a suitable choice for you on trips that require a lot of movement. You will feel uncomfortable and tired with a bulky, too heavy device. Instead, a mini bluetooth speaker is the

most suitable choice for you in this case.

5. Battery life

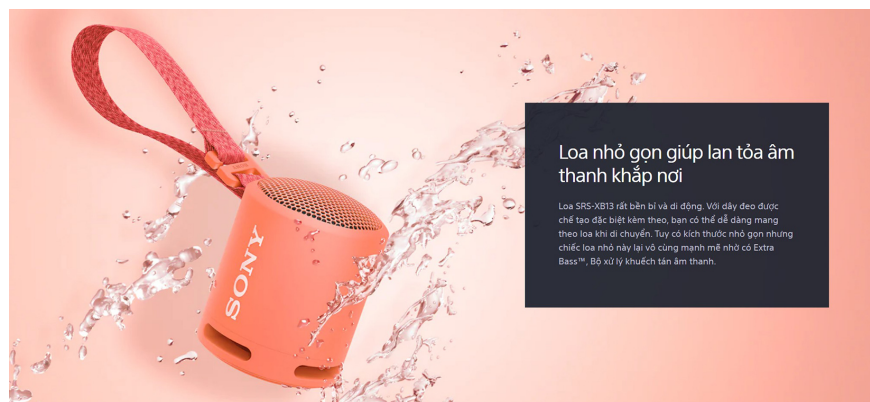

Modern and expensive Bluetooth speakers will have quite good battery quality, as well as long continuous battery life (falling between 6 - 10 hours continuously). You can carefully review this information before choosing to buy a Bluetooth speaker.

Where to buy good bluetooth speakers?

There are many places to buy good bluetooth speakers that you can choose from, however, at HACOM, you can completely rest assured to choose to buy good bluetooth speakers at TipsMake showrooms or see on the website here. 4. SONY SRS-XB43/BC SP6 BLUETOOTH SPEAKER

Enjoy deep, punchy sound wherever you like with your EXTRA BASS™ speaker2. Dual passive radiators work together with the 2-way speaker system to enhance low-end tones, giving bass a boost. The SRS-XB43 has been designed to deliver an irresistible blend of deep, resonant bass and clear, natural vocals.

The X-Balanced Speaker Unit developed by Sony achieves high sound quality and powerful sound pressure, providing a richer, more immersive and satisfying music listening experience.

The rectangular shape of this unit not only maximizes the speaker's diaphragm area, increasing sound pressure for more powerful bass – it also reduces driver excursion and maintains a consistent sound pressure, resulting in less distortion and clearer vocals.

The X-Balanced Speaker Unit isn't the only thing that makes the SRS-XB43 sound so great – there's a host of high-performance audio technologies packed inside.

The XB43's 2-way speaker system combines a woofer for low to mid-range frequencies with a separate tweeter for higher frequencies, resulting in exceptional sound clarity.

Crafted from lightweight yet rigid Mica Reinforced Cellular (MRC) material, the speaker cone and dust cap contribute to enhanced sound quality.

With an IP67 rating, you can take your speaker to the beach, the forest, the desert, or wherever you like – the SRS-XB43 will keep on playing, no matter how dusty the surface. It's also waterproof and salt water resistant – so you can use it by the sea or the pool – and there's no problem washing it.

What's the fun without flashing lights? The SRS-XB43 has tweeter lights, speaker lights, and multi-coloured line lights that flash in sync with the beat. You can even change the colour of the line lights to suit your mood.

Party Connect with multiple devices. Connect up to 100 compatible wireless speakers⁷ with BLUETOOTH® technology and synchronize the music and lights so everyone dances to the same beat. The lights flash in random patterns or in a circle.⁸

Near Field Communication (NFC) and Bluetooth®⁹ technology eliminate the need for wired connections and complicated setup sequences. Simply touch your NFC-enabled device to the speaker for a quick, seamless connection, then start streaming your music collection. No NFC? No problem. Simply connect via Bluetooth and you're ready to go.

Use a USB Type-C® cable to charge the SRS-XB43, and if your smartphone is running low on power, simply plug it into the speaker's USB port to charge it up. An AC adapter is also included, so you can play music without worrying about battery life – and it also provides another convenient way to charge your XB43.
