

Which brand electric thermos should you buy best?

Sharp, Sunhouse, Panasonic are the 3 best hydroelectric brands in the market. Take a look at the following article to find out what hydroelectricity Panasonic, Sunhouse and Sharp have advantages and disadvantages.

Sunhouse, Panasonic, Sharp are 3 very famous brands of electric thermos, which are trusted by users. The following article will show the advantages and disadvantages of Sunhouse thermos, Panasonic thermos, Sharp thermos to help you understand more about the product to have the right choice.

Evaluation of advantages and disadvantages of hydropower plants Sunhouse, Panasonic and Sharp

1. Sunhouse Thermos

Advantages:

The biggest advantage of Sunhouse thermos is cheap. Sunhouse thermos often have selling prices ranging from 780,000 to 1,080,000 VND. This is the economic price suitable for most families.

Simple design with easy-to-clean plastic cover. The bottle operates according to the automatic boiling mechanism, you just need to put water into the bottle and plug the power cord in a short time and immediately have hot water to use.

Large tank capacity from 3 liters - 3.5 liters to meet many user purposes. Binh has 2 convenient pouring modes: electronically, mechanically.

On the body of the bottle has a water level line, with handles to move. In addition, the product is equipped with a lock of water to make it safer to use and limit burns to young children.

Defect:

The model is not beautiful compared to the two brands Panasonic and Sharp, but in return there is a variety of models, types and relatively cheap prices, so it is suitable for Vietnamese consumers.

Typical hydroelectric products of Sunhouse:

1. Sunhouse 3.5L SH1535 thermos flask - Reference price: 799,000 VND
2. 3.3 liter Sunhouse SHD1533 electric kettle - Reference price: 820,000 VND
3. Sunhouse SHD1542 electric thermos (4.2 liters) - Reference price: 1,080,000 VND
4. Sunhouse SH1530 (3 liters) electric thermos - Reference price: 780,000 VND

2. Panasonic electric thermos

Advantages:

Panasonic Thermos is a superior product line, usually made of good materials such as stainless steel, non-stick metal, glazed stainless steel, so its durability is very high. Better design, look very solid, many different capacity levels to choose from.

Panasonic hydroelectric design is extremely modern with the function of selecting the temperature to keep it warm, meeting all user purposes from making noodles, making coffee, tea or making baby formula .

Panasonic hydroelectric design is superior to features such as automatic boil again, hot holding timer, electric water pump mode .

Greater operating capacity for quick boiling time, saving time.

Defect:

Panasonic thermos are much bigger and bulky than those of Sharp and Sunhouse.

Large capacity consumes more power.

The price is higher, ranging from 1,390,000 - 1,790,000 VND.

Some of the best Panasonic electric thermos in the market:

1. Panasonic NC-EG4000CSY electric thermos - 4 liters - Reference price: 1,790,000 VND
2. Panasonic NC-EG2200CSY electric thermos - 2.2 liters - Reference price: 1,390,000 VND
3. Panasonic NC-EG3000CSY electric thermos 3 liter - Reference price: 1,550,000 VND
4. Panasonic NC-BG3000CSY thermos flask - 3 liters - Reference price: 1,650,000 VND

3. Sharp electric thermos

Advantages:

Sharp water bottle with elegant color design, simple design panel is extremely easy to use.

The pot has a variety of large and small capacities ranging from 1.7 liters - 4 liters, suitable for many purposes. The body of the bottle is designed with additional straps to help move easily.

Products with relatively cheap prices range from 715,000 - 1,455,000 VND.

Sharp hydroelectricity has a reasonable capacity: for the type of 1.6-liter to 2.9-liter thermos, it will have a capacity of 610W, for larger types of thermos, usually with a capacity of 670W - 700W. Therefore using Sharp thermos will be very energy efficient.

Defect:

Sharp thermos have only 2 temperature levels: boil at 90 degrees C and keep it hot at 80 degrees C. So when you need to mix milk with a temperature lower than about 55 degrees C to 65 degrees C, users will have to mix Add boiling water to cool.

Sharp thermos have almost no boil or timer to keep warm water so when you need hot water you have to check the amount of hot water in the bottle manually.

Some of Sharp's cheap electric thermos are very popular

1. Sharp KP-Y32PV electronic thermos (3 liters) - Reference price: 1,269,000 VND
2. Sharp KP-36SV thermos - 3.6 liters - Reference price: 779,000 VND
3. Sharp KP-Y40PV 4 liter electronic thermos - Reference price: 1,455,000 VND
4. Sharp KP-A28SV - 2.8 liter electric thermos - Reference price: 715,000 VND
5. Sharp KP-20BTV 1.7 liter electric thermos - Reference price: 865,000 VND

Should buy hydropower Panasonic, Sunhouse or Sharp

Each type of thermos will have its advantages and disadvantages. So if you intend to buy a thermos, you can consider the price, the type of capacity you need to buy to be able to choose 1 of these 3 brands.

If you need to boil water quickly, have the option to add multiple boil and keep temperatures, timer should choose Panasonic thermos.

If only the purpose of boiling and keeping the water warm and the cost is affordable, you can choose Sharp electric kettle or Sunhouse hydropower.
