Understanding this difficulty, TipsMake will help you know which laptop brand is best to buy for both studying, working and playing games.

What is the best laptop brand to buy today?

Which laptop brand is good? Here are **the top 7 best laptop brands today** that **TipsMake** has evaluated and selected.

Picture 1 of Which brand of laptop should I buy? 7 best laptop brands today

1. Apple – High-end laptop brand

Mentioning Apple means mentioning the world's leading technology products, in which laptops called MacBooks have always been very popular with users.

Picture 2 of Which brand of laptop should I buy? 7 best laptop brands today

There are 11 reasons you should immediately own a MacBook:

1. Beautiful and luxurious design.
2. Light weight, average 1.4kg in all series.
3. Sharp screen with modern technology.
4. New luxury butterfly-style keyboard.
5. Integrated cooling fan runs smoothly, does not cause overheating.
6. Equipped with an extremely powerful and smooth Mac OS operating system.
7. Closed Apple ecosystem (easy sync and connection with iPhone, iPad, iWatch,.. devices).
8. Great and vibrant sound quality.
9. Extremely good security with SIP system and many advanced technologies.
10. The trackpad is sensitive and easy to control.
11. Strong battery ensures long-term use.

MacBook currently has a high price compared to other brands. However, with the above advantages and the value of the Apple brand, this is still a product worth considering when you are wondering **which brand of laptop to buy** .

2. Dell – Durable laptop line for students

There are tens of millions of Dell laptops sold each year, this is a huge number to prove that Dell is a very popular and well-received laptop brand globally.

Picture 3 of Which brand of laptop should I buy? 7 best laptop brands today

Outstanding features of Dell laptops:

1. High durability (durable hardware, stable software).
2. Great battery, good configuration.
3. Strong design and quite heavy weight.

It can be seen that Dell highly values ??the development of product configuration and durability, minimizing costs to ensure reasonable prices for users. This is the right decision when you don't know which laptop to buy.

3. ASUS – Mid-range laptop line

Although it cannot be compared with its 'big brother' MacBook, with an average price, ASUS laptops still possess beautiful design and good functionality.

1. ASUS laptops have a thin, light design with rounded corners, suitable for both men and women.
2. The machine's weight is light, very convenient for those who need to move a lot.
3. Battery life is relatively good.
4. Exclusive heat dissipation technology helps keep the laptop from getting hot when used continuously.

Picture 4 of Which brand of laptop should I buy? 7 best laptop brands today

In general, with the need to use simple tasks for studying and office work, ASUS can completely meet the needs. If you need higher configuration for gaming or graphics, you can learn about ASUS's high-end Zenbook line.

4. MSI – Gaming laptop company

When it comes to MSI, people are often amazed by the best quality gaming laptop products. MSI's design is quite aggressive, with a high-resolution screen for vivid images, combined with a unique keyboard to enhance the user's gaming experience.

Picture 5 of Which brand of laptop should I buy? 7 best laptop brands today

MSI also stands out because of its massive configuration, integrating Intel and AMD chips to ensure fast processing capabilities. The battery is rated to be extremely durable, up to ten hours. Comes with a high-end cooling system,...

All create a perfect product for professional gaming. MSI is among the top gaming laptops at the present time.

5. HP – Sophisticated design laptop line

HP is the ideal choice when you are considering **which brand of laptop to buy** . This American brand is a large PC manufacturer no less than Acer and Dell.

Picture 6 of Which brand of laptop should I buy? 7 best laptop brands today

In general, HP laptops are highly appreciated for their appearance and design. The diversity of HP laptop lines helps buyers have many choices in terms of design, configuration and price segment.

6. Lenovo – Laptop for office workers

Although the durability cannot be compared to Dell, Lenovo scores points with super products such as Lenovo Thinkpad, or Lenovo Yoga that can fold 360 degrees, both beautiful and luxurious, thin and light, convenient. At the same time, the company also has many options to accept separate cards to upgrade the device configuration.

Picture 7 of Which brand of laptop should I buy? 7 best laptop brands today

If you are looking for a thin and light laptop with a dynamic and trendy design, Lenovo can completely meet your requirements.

7. Acer Laptop - Cheap laptop line for everyone

Should I buy an Acer laptop? The answer is yes. If you need to find a powerful assistant at an affordable price.

Cheap price is the advantage of Acer laptops. Accompanied by many plus points in design with a variety of designs, quite good configuration and many high-end configuration options for gaming or graphics. With a budget that doesn't really have much money, Acer is not a bad choice.

Distinguishing laptop lines on the market

On the market today, there are many specialized laptop lines, meeting the specific needs of consumers. Let's distinguish more clearly about current laptop lines:

Basic laptop

This is the most popular type of laptop and is suitable for most uses. Because as the name suggests, basic laptops are fully equipped with the basic features of a regular computer, meeting a variety of uses.

All of the major brands mentioned above provide basic laptops with many segments and many different prices.

Chromebooks

This somewhat strange-sounding name is a special laptop. Because Chromebooks do not run Windows or MacOS operating systems, they use Google's Chrome operating system.

Picture 9 of Which brand of laptop should I buy? 7 best laptop brands today

Chromebooks are a great choice for those who don't know **which brand of laptop to buy** and want to own a laptop that is super thin, super light and easy to carry anywhere.

Ultrabooks

Ultrabook is a line of laptops with a thin, light and trendy design. Ultrabook models are often upgraded by manufacturers in terms of appearance and features.

Although the battery capacity is not as long-lasting as basic laptops, it is still optimized to not interrupt work. Along with that is the continuous upgrade in performance as well as task processing speed.

Picture 10 of Which brand of laptop should I buy? 7 best laptop brands today

Workstation

Workstation is a line of workstation laptops. Workstation was born specifically for professional graphics and scientific and technical purposes.

Workstations have powerful configurations, high-end and easily upgradeable graphics cards, good cooling systems and gorgeous screens.

2 in 1 laptop

This is a versatile laptop that can both act as a basic laptop and can also become a tablet when needed.

2-in-1 laptops are loved by many people when they can own up to 2 devices (laptop and tablet) in the same product. When it comes to 2-in-1 laptops, you can consider brands like HP, LENOVO, DELL.

Laptop specializes in gaming

The demand for gaming from casual, entertainment to professional is increasing, so gaming laptops have never stopped being hot. This is considered a separate laptop line with outstanding features.

1. Laptops specializing in gaming have a bold, massive design and large machine size.
2. The machine's configuration is much more advanced than regular laptops, enough to run smoothly when playing heavy games.
3. High RAM capacity ensures large storage capacity.
4. High resolution screen, full HD, UHD 4K.
5. Good cooling system with high-end fan system.

Compare which brand of laptop is best

Trademark	Advantage	Defect
Apple	<ul style="list-style-type: none">– Beautiful, luxurious design, thin and light design– Strong processing speed, high multitasking ability– Long battery life, quite durable over time– Large storage space, easy to synchronize with other devices in the same system ecology– Vivid images, realistic sounds	<ul style="list-style-type: none">– High price, belongs to the high-end laptop segment
HP	<ul style="list-style-type: none">– Modern appearance, soft design– Beautiful images, vivid sound– Fast processing speed	<ul style="list-style-type: none">– Battery is not durable, runs out of battery quickly– Configuration is still weak compared to many other laptop brands– The device easily gets hot if used for a long time
Dell	<ul style="list-style-type: none">– The machine is highly durable– Stable configuration, few errors– Relatively reasonable price for many segments– Ultra thin and light design, high quality, modern metal frame	<ul style="list-style-type: none">– The machine is quite heavy– Heats up quickly when used continuously
Lenovo	<ul style="list-style-type: none">– Integrates many technologies such as fingerprint sensor, 360 degree folding– Full HD screen	<ul style="list-style-type: none">– The configuration is not really strong– The sound quality is not so excellent– ??The battery drains easily
ASUS	<ul style="list-style-type: none">– Reasonable price– Thin and light device, soft design– Keyboard has good bounce– Suitable for office workers and students	<ul style="list-style-type: none">- Multitasking ability is not high- Appearance is not too excellent and modern -The device runs out of battery quickly
Acer	<ul style="list-style-type: none">– Powerful heat dissipation technology– High configuration, smooth graphics– Vivid sound	<ul style="list-style-type: none">– The fan is relatively noisy– The machine size is larger than many other models
MSI	<ul style="list-style-type: none">- Great configuration, good experience when playing games, graphics- Beautiful sound and images- Integrating many advanced technologies, high multitasking- Bold, strong and masculine design	<ul style="list-style-type: none">– Price is relatively high in most segments.

Criteria for choosing a suitable laptop brand

Don't ignore the most important criteria to choose the right laptop brand and product for you:

Uses

Specifically: What do you buy a laptop for?

When you clearly identify your needs, it will be easier for you to make the appropriate decision. Avoid wasting money on a laptop that doesn't fully meet your needs.

You can ask for advice from the staff where you bought the laptop for basic needs such as: studying, office work, graphic design, gaming, engineering, etc.

Good prices & deals

If you only intend to buy a laptop in a certain segment, please refer to the following suggestions:

1. **In the affordable segment:** the most suitable choice is a Chromebook, or a laptop running a low-end Windows operating system. With sufficient storage capacity and stable configuration from ASUS and ACER brands.
1. **Above-average segment:** You can refer to laptops with Intel Core i5, Core i7 or AMD A8 processors. With an average RAM capacity of 4 - 8 GB. The best choice lies in products from the brands DELL and HP.
1. **High segment :** This price is extremely ideal for you to own a laptop with powerful configuration and beautiful design. MacBook, Lenovo, Dell are suitable laptop brands in this price segment.
1. **High-end segment :** With this budget, you can choose products in the high-end segment of today's leading brands. This segment is guaranteed to meet the strict needs of users.

Reputable purchasing address

This criterion is very important so you can confidently choose where to deposit your gold. Because, to buy a good laptop, you will need to spend a large amount of money. So, don't be subjective, choose a reputable laptop supplier to shop!

Warranty Policy

During use, there is no guarantee that you will not encounter any problems. It could be due to a manufacturer error, and if you have a warranty, you will not have to pay any costs to repair it, and you can even exchange it for a new one.

Steps to check laptop before buying

Immediately pocket the process of checking a laptop before buying below, which is also a valuable experience that people in the industry have learned, not everyone knows:

1. **Step 1:** Check the packaging and outer box.

2. **Step 2:** Check the product and accessories included inside.
3. **Step 3:** Turn on the laptop and check each feature of the device in detail.
4. **Step 4:** Check the machine configuration.
5. **Step 5:** Check battery life and power cord.
6. **Step 6:** Check the computer screen, check for dead pixels.
7. **Step 7:** Check the connection ports.

Experience - Should I buy a used laptop?

Buying a used laptop is the plan of many people when their budget is limited. Join TipsMake to analyze the pros and cons of buying a used laptop, and then make the right decision:

Reasons to buy a used laptop?

1. **Price is cheaper than a new laptop:** depending on the condition of the device, the price you pay for an old laptop will be 5 to 9 million lower than a new product of the same type.
1. **There are more options in the price range:** You can absolutely own old laptops at reasonable prices after the manufacturer launches many new and more advanced laptop generations.
1. **Easy to replace and upgrade after a short period of use:** Old laptops are suitable at times when there is not enough financial resources to buy a new laptop. Later, when you have more money, you can buy a new laptop.

Picture 14 of Which brand of laptop should I buy? 7 best laptop brands today

Risks when buying used laptops?

1. There may be software and system errors.
2. The external appearance of the laptop may be scratched or dented.
3. Old laptops have likely had their internal components replaced.
4. Old laptop batteries wear out quickly and break down quickly because they have been used before.

Therefore, you should consider whether to **buy a used laptop or not** . And pay special attention to carefully checking the origin, hardware and software to ensure the quality of the laptop still meets your needs.

Epilogue

Above is the knowledge and experience about choosing to buy a laptop, hopefully it has helped you know **which brand of laptop to buy** . And **TipsMake** hopes that you will find the most satisfactory product.
