

Which browser is the fastest on Android: Chrome, Firefox, Samsung Browser or Edge?

Phonearena's technology page has performed a number of tests to compare the quality of the current four top web browsers, version 63 of Chrome, the latest version of Firefox 57, the latest version of Samsung Browser, and the medium version. New update of Microsoft Edge on Galaxy Note 8.

The 4 most popular web browsers are Chrome, Firefox, Samsung Browser and Microsoft Edge. But have you tried all 4 web browsers yet, and do you know which browser is the fastest on Android today?

Face point 15 the safest web browser for Android

Phonearena technology page has done some tests to compare the quality of these four popular web browsers on Chrome version 63, the latest version of Firefox 57, the latest version of Samsung Browser, and the new version Microsoft Edge updates on Galaxy Note 8.

The results of the Speedometer test, the test help to synthesize to calculate the reaction speed of web applications, not too much surprise for many people, Google Chrome is number 1. Next is Microsoft Edge in the No. position. 2 and Samsung Broser are in third place. Firefox makes many people disappointed when only half the point compared to the remaining browsers.

	Samsung Browser 6.2	Google Chrome 63	Firefox 57	Microsoft Edge
Speedometer	37.9	41.62	19	40.09
JetStream	68.428	64.839	63.563	63.606
MotionMark	30.76	92.91	20.04	98.77
Basemark Web 3.0	129.15	190.37	152.61	212.12

**higher is better*

Test results speed and performance of the four browsers (high score = good quality).

When testing the performance of extended features like JavaScript 3D, encrypting throughput with JetStream tests, the results are relatively similar, only the Samsung Browser is a little better.

Microsoft Edge took the lead in the Motion Mark test, helping to evaluate graphics. And in Basemark Web 3.0 test, multi-platform testing by winning 3rd party still belongs to Microsoft Edge.

Through 4 tests, Microsoft Edge has just been launched by Microsoft and Android but it has caused a big surprise when winning 2 articles.

According to the general assessment, in every Google Chrome test, it still maintains its stable performance. Meanwhile, Firefox is constantly being surpassed by other rivals, making many people frustrated. Earlier, a new version of Firefox, called Quantum, was released by Mozilla, which currently only optimizes performance for computers.

The Korean browser Samsung Browser is rated quite well, relatively fast in most cases, but it has a few problems with web compatibility.

1. Instructions and things to know when using the latest version of all browsers
2. Comparison between Chrome and Puffin browsers
3. The unique feature of Firefox Rocket browser on Android
