

# Which country has the fastest Internet speed in the world?

You are extremely strict about internet connection speed, do you want to live in the country with the fastest internet speed in the world? What are you waiting for, move to Singapore now!

You are extremely strict about the speed of Internet connection, you want to live in the country with the fastest Internet speed in the world? What are you waiting for, move to Singapore now!

Yes, our brothers in the community of ASEAN countries not only own fast Internet speeds, but also the fastest in the world! According to a recent report by Compare the Market, a UK-based organization that compares prices based on prices, the island has surpassed Korea to capture the position. No. 1 in the list of countries with the fastest Internet connection in the world. Specifically, the organization conducted Internet speed surveys and analyzes in more than 50 countries, and then ranked these countries based on a number of key factors such as: Cost, download and upload speeds, and the time to download a Netflix content about an hour long.

## 1. How can IoT help you enjoy 4.0-style meals?

Singapore occupies the first place in average download and upload speeds, and of course it is also where you will spend the least time to successfully download a Netflix program with an exact time of 1 hour.

Country	Avg. Monthly Cost	Avg. Download Speed	Avg. Upload Speed	Time to Download One Hour of Netflix
<b>Singapore</b>	£39.84	<b>185.25 Mbps</b>	<b>192.08 Mbps</b>	<b>16 seconds</b>
Iceland	£60.56	153.3 Mbps	155.46 Mbps	20 seconds
South Korea	£25.51	114.31 Mbps	90.2 Mbps	26 seconds
United States	£53.48	107.28 Mbps	37.11 Mbps	28 seconds
Sweden	£44.23	106.76 Mbps	72.98 Mbps	28 seconds

Singapore is the only Southeast Asian country to reach the top 5 countries with the fastest Internet connection. Following closely behind are still familiar names like Iceland, Korea, the United States and Sweden.

The truth is that this is not a shock, nor is it the first time this small island nation has been honored. Singapore is often hailed as a modern, integrated country, people have a high understanding of the internet, along with a very good Internet connection, constantly being in the top of many different lists and reports.

However, Internet costs also seem to be proportional to the speed in Singapore. The average cost of Internet use in this country falls to around £ 39.84, which is approximately 1.2 million VND, and ranks 25th in the world in the list of countries with the most expensive network costs. The cheapest Internet cost is in Israel with the average amount that people spend monthly to access the network at 10.29 pounds, equivalent to 311 thousand VND.

1. The Internet is experiencing a huge problem with C / C ++, causing developers to "sweat"

Going back to the report of Compare the Market, Brunei is the second Southeast country mentioned and located at the bottom of the rankings with an average download speed of only 15.15 Mbps, and Internet service packages. In this country is also very expensive, averaging £ 97.40 (nearly 2 million) a month. For a country with a large oil reserve, a high per capita income like Brunei is surprising when the Internet - a basic need - is relatively limited and expensive.

Country	Avg. Monthly Cost	Avg. Download Speed	Avg. Upload Speed	Time to Download One Hour of Netflix
Brunei	£97.40	15.15 Mbps	10.36 Mbps	3 minutes, 18 seconds
