

Which country is Asus laptop from? Best experience in choosing to buy Asus

Asus is a familiar electronics brand with many outstanding product lines. Which country is Asus laptop from? Are Asus laptops good?

Asus is a familiar electronics brand with many outstanding product lines. **Which country is Asus laptop from ?** This is a seemingly simple question but many users still do not know. Are Asus laptops good? The following article will update you with useful information.

Which country is Asus laptop from?

Asus is a Taiwanese multinational technology corporation founded in 1989. The company is known for its electronic products such as laptops, smartphones, etc.

Fortune magazine named ASUS one of the world's most admired companies in 2015, 2016. For many years, Interbrand has rated Asus as Taiwan's most valuable international brand.

In Vietnam, this brand has long been known for its low-cost laptop products. In terms of laptop products alone in 2016, the product sales volume was the highest with an average proportion of 34.75%.

In addition, Asus is also promoting the development of advanced devices such as IoT (Internet of Things), smart robot technology. In particular, in the most recent period, the company announced a smart robot for home use called Zenbo with many classy designs.

Currently, this company has more than 17,000 employees, in which the research and development team stands out with world-class strength. Throughout the journey of building, developing and improving, Asus has continuously affirmed its fierce competitiveness through smart technology products launched on the market. In 2016, the company proudly achieved 4,385 awards and 13.3 billion USD in revenue. Here, the answer to the question of **which country Asus laptops are from**, with a long-standing brand and quality reputation in the industry, Asus has gradually become one of the giants in the profession.

Popular laptop lines today

Asus aims to meet the needs of all users, with a clear differentiation for its product lines. Asus laptops have a full range of products for different customer groups such as:

Asus Vivobook: This is a popular laptop line with a simple design, suitable for studying and working.

Asus ROG, Asus TUF Gaming: Laptop line for gamers with a very aggressive design. The machine has good heat dissipation and very powerful configuration.

Asus Zenbook: The business laptop line is a laptop with an extremely luxurious appearance made from high-quality materials.

In addition, Asus also has a unique 2-in-1 laptop line - Vivobook Flip, Transformer Book, Zenbook Flip: with this laptop line, you can turn it into a tablet with a 360-degree rotation. The laptop line is both versatile and compact, convenient for travel.

Are Asus laptops durable?

- Advantages: ASUS laptops are thin, light and easy to move anywhere. The machine has high configuration, durable components, and good battery life.

- Disadvantages: Some cheap ASUS models have poor quality speakers that only last about 2-3 years before becoming noisy. The hinges of laptops with plastic shells will also become weaker after a long time of use.

Should I buy an Asus laptop?

Realistic, vivid images

Asus computer screens are almost all different sizes. However, all screens have sharp HD resolution (1366 x 768). Therefore, they provide realistic, vivid images and good viewing angles. Asus screens are sized from 11.6 inches, 15.6 inches or even 17.3 inches.

Vivid sound

Exclusive SonicMaster and AudioWizard sound technologies to differentiate the sound system for its product line.

Asus laptops are equipped with sound systems with True-to-life Surround, Powerful Volume modes, etc. These modes provide very good sound quality.

ASUS laptops are always innovative

ASUS is the brand that invented TrackPoint. The cursor control device is recognized by all users for its high efficiency. In addition, the brand also invented WRITEit. This is a handwriting recognition software. You can use it to write with a special pen instead of typing on the keyboard.

Price

Currently, the low-end and mid-range Asus laptop lines on the market have prices ranging from 7 to 20 million VND. The higher-end versions will cost around 30 to 40 million VND. This price is considered reasonable for the experience that customers receive.

Best Asus buying experience

Asus is the top choice brand for many customers. However, before shopping, users should consider their needs for: studying, working, designing, gaming, and financial conditions to find the right type.

In addition, customers should prioritize choosing authorized agents and reputable distributors to ensure purchasing genuine and quality products. You need to be careful to avoid counterfeit and fake products on the market.
