Origin of the Dewalt drilling machine brand

Dewalt battery drill comes from famous American brand. Founded in 1924 in Pennsylvania - USA, DeWalt Group has gradually affirmed its position in the mechanical industry. The Dewalt brand product lines include: angle grinders, polishing machines, blowers, wood saws, parasitic saws, sword saws, dynamic drills, hammer

drills, concrete chisels . Talking To Dewalt's drill, you can be assured of quality by the leading mechanical brand that has experience and reputation in the market for nearly 100 years. So, how good is the Dewalt battery drill? Let's go with Quatrimang to find out!

Is the Dewalt Battery Drill good to use?

To judge if a drill is really good, people not only rely on specifications but also design, usability and especially battery capacity for battery drill. In addition, many brothers are also interested in prices when selecting drilling machines to meet the purpose of use and economic conditions. To learn more, Quatrimang will help you analyze each of these elements at the Dewalt battery drill!

Design

The design of the Dewalt battery drill is out of the question. You will fall in love with the product from the first time encountered by outstanding colors, strong, solid and handy design. The Dewalt battery drill possesses a black gold color that stands out the brand's style. Each detail on the drilling machine is firmly machined, ensuring a stable and safe operation during use.

In addition, rubber-coated handle design is also very safe, creating friction, anti-slip when drilling. Reasonable design switches, easy to use. Most Dewalt battery drills are equipped with a flashlight to help you easily operate in dimly lit locations.

Drilling ability

In the 2000s, when referring to the Dewalt drilling machine in the Vietnamese market, perhaps this is the hottest and most popular product. Dewalt focuses on product quality, so all Dewalt drills are manufactured on a rigorous process, applying new technology, giving strong, stable and safe drilling capabilities.

Dewalt's battery drills are mostly equipped with 2 speeds for you to choose from. In addition, reversing switch allows you to flexibly drill and remove screws easily.

Battery voltage

Dewalt battery drill has a high voltage and large battery capacity so you can use it continuously for a long time. Each Dewalt battery drill is equipped with 2 batteries and a backup charger that can be replaced at any time.

However, to ensure the best performance, you should fully charge the battery before use.

Price

The cost of Dewalt drilling machine is quite high, with prices ranging from 2 million to 7 million. Perhaps this is the only drawback of this drill line. Despite the good quality but the high price, the products from Dewalt are still not favored much in the Vietnamese market.

Dewalt's top 3 battery drill good price, good quality can not miss

1. DeWalt battery screwdriver DCD700C2 costs VND 2,225,000

DeWalt battery screwdriver DCD700C2 has a nice design, fasten by hand without using a lock. The torque of the machine is optimized with a 2-speed gearbox, suitable for screwing and speed guarantee for drilling work. DeWalt DCD700C2 uses impressive Lithium-ion battery technology with high capacity and long-term stability.

Technical specifications

1. Charging time: 30 minutes
2. Clamp head size: 1mm - 10mm
3. Battery capacity: 10,8V - 1,3AH
4. Screw: 6mm
5. Capacity: 180W
6. No-load speed: 0-400 rpm; 0 - 1,500 rpm
7. Iron drill diameter: 10mm
8. Wood drilling diameter: 19mm

2. Dewalt DCD710D2 battery screwdriver drill costs VND 2,360,000

Dewalt DCD710D2 portable drill uses XR Lithium-Ion 10.8V battery manufactured by Dewalt itself. The advantage of this battery is: compact, high capacity for longer usage time. In addition to a battery attached to the device, the product is also equipped with a backup battery and a charger for you to replace at any time.

Technical specifications

1. Battery voltage: 10,8V
2. Machine type: Battery drill
3. Battery type: XR Lithium-Ion battery
4. No-load speed: 0 - 1,500 rpm
5. Wood drilling diameter: 20mm
6. Steel drill diameter: 10mm
