Which device models does iOS 18 support?

Apple has officially announced the list of iPhone models that will be upgraded to iOS 18 at WWDC 2024. This is good news for many iPhone users because iOS 18 brings many notable features and improvements. Below is the list of iPhone models that will receive the iOS 18 update:

- **iPhone 15 Pro and iPhone 15 Pro Max**
- **iPhone 15 and iPhone 15 Plus.**
- **iPhone 14 Pro and iPhone 14 Pro Max.**
- **iPhone 14 and iPhone 14 Plus.**
- **iPhone SE (2020) and iPhone SE (2022).**
- **iPhone 13 Pro and iPhone 13 Pro Max.**
- **iPhone 13 and iPhone 13 mini.**
- **iPhone 12 Pro and iPhone 12 Pro Max.**
- **iPhone 12 and iPhone 12 mini.**
- **iPhone 11 Pro and iPhone 11 Pro Max.**
- **iPhone 11.**
- **iPhone XR.**
- **iPhone XS and XS Max.**

Notably, iOS 18's advanced AI features, called "Apple Intelligence", are only available on iPhone 15 Pro and iPhone 15 Pro Max. These features include improvements to Siri, automatic meme generation, article summaries, and many other smart functions. Other devices still get iOS 18 with many new features, but without these special AI capabilities.

How to update iOS 18, upgrade to iOS 18 version

To experience the new features of iOS 18, users can update their operating system by performing the following steps:

1. Update iOS 18 via OTA (Over-The-Air)

- **Step 1: Check the device.** Make sure your iPhone is in the list of supported devices and has enough free space to download and install the update.
- **Step 2: Back up data.** Before updating, back up your important data to iCloud or via iTunes to avoid data loss if something goes wrong during the update.
- **Step 3: Connect to Wi-Fi.** Make sure your iPhone is connected to a stable Wi-Fi network and has enough battery (preferably connected to charge during the update process).
- **Step 4: Access Settings.** Open the Settings app on your iPhone.
- **Step 5: General settings.** Select "General Settings" (General).
- **Step 6: Update software.** Select "Software Update".
- **Step 7: Download and install.** When iOS 18 appears, tap "Download and Install". The download may take some time depending on your internet speed.
- **Step 8: Restart.** Once the download is complete, your iPhone will ask to restart to install the update. Click "Install Now" and wait for the installation to complete.

2. iOS 18 Beta Update (for developers and testers)

If you want to experience iOS 18 Beta before the official version launches, you can register and install with the following steps:

- **Step 1: Log in to Apple ID.** Go to the Apple Developer Center (<https://developer.apple.com/account>) and sign in with your Apple ID. You don't need to join the Apple Developer Program, just sign in and agree to the terms (if applicable).

- Step 2: Install the Beta version

- + Open the Settings application on iPhone.
- + Select General settings (General).
- + Select Software Update.
- + Select Beta Updates and select the iOS 18 Developer Beta option.
- + Go back to Software Update and wait for the iOS 18 beta version to appear and start downloading.
- + After the iOS 18 Developer Beta version appears, select Download and Install to update.

- **Step 3: Restart.** Your iPhone will restart once the download is complete and the beta installation begins.

3. Notes when updating iOS 18 Beta

- **Backup data:** Always back up data before installing the beta version to avoid data loss.
- **Beta versions can be unstable:** Beta versions are often buggy and can cause unexpected problems. Please consider before installing on your primary device.
- **Restart iPhone:** If you don't see the beta update, try restarting your iPhone and make sure you're running iOS 16.4 or higher.

iOS 18 brings many exciting new features and improvements to iPhone users, from home screen personalization to security and artificial intelligence improvements. This update will support multiple iPhone models, ensuring more users can experience Apple's latest features. Check if your device is supported and follow the update steps to enjoy iOS 18.
