

# Which dispenser has a anti-shock function for the family?

Buying a heater with a built-in function is a very smart and economical option. So which anti-shock heater is good?

For hot and cold water heater products, the current anti-shock equipment is extremely necessary to ensure safety. Instead of having to spend the extra cost to buy additional shock-proof equipment to install separately for your family's water heater, buying a heater with a built-in function is a very smart and economical option. . So which **anti-shock heater** is good? Let's learn more about quantrimang!

## The role of anti-shock function for water dispenser

Unlike conventional appliances, water heaters are devices that operate on the principle of heating, using electricity so there are potential dangers if used incorrectly and do not comply with safety rules. safe. One of the biggest and most important dangers is the electrical leakage, water pollution into the water causing electric shock.

Recognizing the importance of this problem, today, water heater manufacturers have added an electric shock protection (ELCB) mechanism to their water heaters to ensure safety. Let's see how the ELCB plays!

1. Automatically disconnects the current when the leakage current exceeds the allowed level, helping to safeguard users from dangerous accidents during hot baths, bringing comfort to you and your family. .
2. Limiting electrical incidents inside the machine, ensuring safety for human life as well as fire and explosion prevention.
3. Ensuring safety for electrical equipment system and ensuring to overcome current leakage problems.
4. Help save energy and bring the highest safety for users in wet environments such as bathrooms.

## **Introduce some hot and cold water bottles with anti-shock function**

**Ariston SB35E-VN 3500W direct heater - Reference price: 1,590,000 VND**

As expected from a golden hand of a famous Italian designer, Ariston SB35E VN water heater has a luxurious, compact design, optimal ergonomic design, strong operating capacity, is the perfect choice for the needs of the whole family.

The machine is equipped with EMC standards to ensure electromagnetic compatibility and ELCB anti-shock bipolar breakers, ensuring that family members are always safe to use. Especially, the outer shell is waterproof, meets IP25 standard, users do not have to worry about accidents caused by electricity.

The system controls the water flow to the machine, making sure to only heat when the water flow is sufficient and shut itself off when the amount of water entering the machine is too weak, limiting cases where the machine is burnt dry or overheating the tap. user.

**Rossi Saphir RS-32SQ 32 liter anti-shock heater - Reference price: VND 1,890,000**

With a luxurious rectangular design, up to 32 liters capacity, the 32-liter Rossi dispenser helps store more hot water, meeting the needs of many families.

The device has a high-end Sapphire enamelled jar design, durable, does not contain harmful chemicals, ensuring safety for user health.

The outer shell of the device is made of virgin ABS plastic material for high durability, waterproof ability, preventing water from entering inside. Super-durable heating rods help to heat water quickly, super-sensitive ELCB leakage protection device is absolutely safe to use.

**Ferroli VERDI 30L indirect heater - anti-shock 2,500W - Reference price: 2,590,000 VND**

Ferroli VERDI-30l anti-shock heater heats water indirectly, has separate inlet and outlet pipes, so you can use hot water several times after one heating.

Ferroli VERDI 30L 2,500W is equipped with ELCB electric leakage protection device, which automatically disconnects itself from the power source when there is a leakage. It also allows users to choose the appropriate power level between 1000W - 1500W to ensure fast heating performance for you without waiting for long and save energy when used.

**Ariston 15 liter AN2 15 TOP 2.5 FE anti-shock heater - Reference price: 3,950,000 VND**

Ariston AN2 15 TOP 2.5 FE has a powerful operating capacity of up to 2,500W which helps to make hot water quickly in just 20 minutes. The product has an ELCB safety control circuit and a circuit breaker to protect you and your loved ones from electrical hazards.

In addition, the heater rod of the heater is made of 100% Titanium for outstanding durability, meeting the needs of your family for a long time. The product is integrated with ECO-EVO technology. 14% significant electricity for each family.

**Panasonic anti-shock water heater with auxiliary pump Panasonic DH-3RP2VK-3500W - Reference price: 3,295,000 VND**

Panasonic DH-3RP2VK-3500W direct water heater has a quite simple, compact design, does not take up too much space of your bathroom. It also has a handy wall mounted shower mounted on the slider.

DH 3RP2VK is also equipped with a power pump so suitable for both weak and unstable water sources. Besides is the ability to save power and effectively prevent equipment wear. The machine is also equipped with ELB leakage protection circuit breaker that can cut off electricity when detecting incidents, and is safe for families to use.

The above is our share about the role of anti-shock heater and suggest products that have anti-shock function for your reference. Hope it helps you find a good product that is suitable for your family.
