How to choose the best iron cutter

To choose a good, quality iron cutter, refer to a few suggestions below:

Determine the purpose and need of use

This is quite an important job if you want to own a good cutting machine and quality. What do you use an iron cutter to do? Cutting billet, cutting angle, cutting steel plate or steel pipe? Depending on the material you want to cut, you can know which one to buy.

Iron cutting machine capacity

Capacity has a great influence on blade speed, work efficiency as well as the quality of finished products after cutting.

Depending on the nature of the job, you can choose the appropriate capacity level. If you often have to cut hard weather, choose a machine with a large capacity of about 2,000W or more.

Besides, you should also pay attention to the factor of no-load speed of the machine.

Features of iron cutting machine

A good iron cutting machine needs to equip many features to meet the increasing demand of users.

Some basic features like:

1. Automatically disconnects when overloaded.
2. Energy saving.
3. Insulating ability to protect safety for users.

However, a machine with a variety of functions will have a high price. Therefore you need to base on the actual needs to get a reasonable choice.

Design of the machine

A must-have point is that the cutter needs to be equipped with sturdy, anti-slip handles, along with a blade protective plate to avoid colliding with human hands or other objects.

The bigger the machine, the better. Just the machine has a suitable design, ensuring easy operation is best.

Trademark

Machine brands also affect quality. Below we will help you choose which brand iron cutter should be used between Bosch, Makita, Maktec and Total.

Which brand iron cutting machine is best?

1. Bosch iron cutting machine

About brand:

Bosch is a brand that provides leading technology and services in the world. Business activities of Bosch focus on four main areas: automotive technology, industrial engineering, consumer goods and construction technology, energy.

Referring to Bosch, people will immediately think of great advances in science and technology, quality and innovation.

About the product:

As for iron cutting machines in particular, products from Bosch are given priority in design, ensuring maximum safety for users. Besides, they are also integrated with many smart features to help users quickly and efficiently.

Bosch iron cutting machine is designed with aluminum body, sturdy shaft system, effective anti-vibration system that delivers high performance when operating. In addition, the Bosch handle is also focused on helping users to be safe, easy and convenient material clamping system is also highly appreciated by users.

2. Makita iron cutting machine

About brand:

Makita is Japan's leading brand of portable power tools. Thanks to being produced on the most modern and advanced technology line, Makita products always confirm the quality and are highly appreciated by consumers.

Currently, Makita is considered a leading competitor to the Bosch brand to bring to users the best quality products at the most competitive prices.

About the product:

Makita's iron cutting machine is equipped with a guide plate that allows users to adjust to change the position easily. Accordingly, the angle of change is adjustable from 0 - 45 degrees. With Makita, you can easily replace the blade thanks to tongue twisting.

3. Maktec iron cutting machine

About brand:

Maktec is the sub-brand of Makita, separated to develop in-depth towards handheld products such as: Hand-held grinding machine, portable iron cutting machine, electronic welding machine .

Inheriting the quintessential features of Makita, even after being born, Maktec is constantly trying to get a place in the hearts of users.

About the product:

Maktec iron cutting machine is quite diverse in design and type. Especially with the mid-range price will be more suitable for more customers.

However, on the market today, Maktec's cutting machines are being counterfeited so much. Therefore, to buy genuine products, you should also consider the reputable quality of purchase address when you need it.

4. Total iron cutter

About brand:

Total is a well-known brand specializing in the supply of civil products, hand tools, electrical machinery and safety equipment for families, factories as well as construction sites.

As a German brand, there is a factory that meets US and European standards in China, so the cost of Total iron cutter will be somewhat cheaper than the rest of the brands.

About the product:

Total iron cutting machine possesses a compact design with many smart features and utilities that can meet the strict requirements of consumers.

Each brand has its own advantages, if you want to own advanced cutting machines and don't mind investing, you can choose products from Bosch or Makita. If the financial problem is a problem, neither Maktec nor Total product lines are too bad choices.

Product Specifications

Total iron cutting machine TS92035516 355mm

Selling price: 1,790,000 VND

1. Warranty: 6 months
2. Brand: Germany
3. No-load speed: 3,800 rpm
4. Capacity: 2,350W
5. Motor core: Copper wire
6. Cutting blade diameter: 355mm

Bosch GCO 200 iron cutting machine

Price: 2,818,000 VND

1. Warranty: 6 months
2. Brand: Germany
3. No-load speed: 3,800 rpm
4. Capacity: 2,000W
5. Grinding / cutting disc diameter: 355mm

Makita LW1401 iron cutting machine

Selling price: 3,450,000 VND

1. Warranty: 6 months
2. No-load speed: 3,800 rpm
3. Cutting blade diameter: 355mm
4. Power: 2.200W
5. Noise level: 102dB

Maktec MT241 iron cutting machine

Price: 2,580,000 VND

1. Warranty: 6 months
2. Brand: Japan
3. Grinding / cutting disc diameter: 355mm
4. No-load speed: 3,800 rpm
5. Capacity: 2,000W
