Although the design of Sharp's Side by Side refrigerator is somewhat simple, the details are meticulously processed, achieving perfection and high durability. So this is still a very popular refrigerator line in the market.

Experience choosing to buy a Side by Side refrigerator

To buy the best refrigerator for your needs, you need to consider many factors. So, here, we will share a few Side by Side refrigerator buying experiences for your reference.

Design and capacity: Side by Side refrigerators usually have a fairly large capacity, from 400 - 700 liters or more to suit families of the same people. Therefore, you need to carefully consider what your family's needs are because buying a cabinet with a capacity that is too small for your needs will cause you a headache when trying to find a way to fit the cabinet. But if you buy a cabinet with a large capacity, it will be a waste. In addition, the Side by Side refrigerator now has many different sizes and designs such as 2 wings, 3 wings, 4 wings. Please consider and choose products with the right size and design for the space. your kitchen!

In addition, the Side by Side refrigerator has many different types of shells such as stainless steel, titanium shell, stainless steel or aluminum alloy shell . but the stainless steel case is still appreciated for its durability and elegance. However, this type of material has a disadvantage of sticking to fingerprints, so it will be more difficult for you to clean it regularly to keep the refrigerator cover shiny.

Refrigerator and freezer compartments: Although the refrigerator and freezer compartments are often quite similar, the number of compartments, shelves or arrangement of each brand is very different. Therefore, you should carefully refer to the image of the product before deciding to buy.

Ice making capacity: You also need to consider the ability of the refrigerator to make ice. Many ice makers take up most of the freezer, but high-end models have an ice maker built into the door, freeing up space in the freezer.

Water filtration, control and ice: These are extra features not all Side by Side refrigerators have, so you need to keep in mind that products with these features often cost more than refrigerators. have extra features.

Ability to save electricity: The ability to save electricity is one of the points you cannot ignore when choosing to buy a refrigerator. You can check and compare models of refrigerators of the same capacity with each other to see which model uses less electricity. Low-power models are usually more expensive, but you'll save money on electricity over decades of product use.

Warranty period: Refrigerator can usually be used for up to ten years, but during use, problems may occur. Therefore, you should carefully check the warranty period and product warranty regulations, especially with CBU imported refrigerators.

Price: Price is definitely something that everyone must consider before buying any product. Therefore, you should anticipate your financial ability as well as your needs and based on that to find the most affordable product. Because not the product with the most modern features, the most expensive price will be suitable for everyone.
