

Which laptop for business trip?

If your business requires frequent mobility, the essentials such as flexibility, durability, long battery life, security ... are very important when choosing to buy a laptop.

If your business requires frequent mobility, the essentials such as flexibility, durability, long battery life, security . are very important when choosing to buy a laptop.

Here are the best converged laptops with the above features by *Forbes.com* 'suggestions' for your choice.

1. Lenovo ThinkPad SL400

The machine has a market price of about 600 USD (about 11 million VND). It has a durable, rugged design and Intel Core 2 Duo processor for high processing speed. The 14.1-inch display is big enough for your eyes to feel comfortable and just enough in a compact design for movement while working.

The SL400 allows users to easily remove the optical drive by hand to facilitate the convenience of replacing one optical drive. In addition, Lenovo integrated the ThinkPad SL400 with high protection features such as active protection system (APS), restore and save data with a shortcut, automatically repair important system files. Corrupt System Repair, backup data.

Although 5.5 pounds (about 2.4 kg) is the ThinkPad SL400's drawback, users will definitely feel satisfied when working on the device.

2. Asus P30A

Famed for its low-cost, attractive design netbooks, Asus has hit the business laptop market with the ultra-portable P30A. The Asus P30A maintains the same weight and size as a netbook, but offers powerful workflow capabilities with Intel Core 2 Duo processors and 13.3-inch LCD screens that use LED resolution technology. resolution 1,366 x 768 pixels.

The chassis is made up of magnesium alloy that will help users not to worry when there is a collision while traveling. In addition, fingerprint security mode prevents data loss.

Users can choose the model with hard drive capacity of 320 GB or 250 GB. It supports Bluetooth 2.1, Wi-Fi, 3G connectivity, 1.3 megapixel webcam, HDMI connector and a DVD burner. The device has a size of 32.3 x 23.2 x 2.61cm with a weight of 1.5kg including battery.

3. Sony VAIO Z-Series

Designed for users of laptops on 'every step', the VAIO Z-Series weighs only about 1.5 kg and a new 13-inch display technology uses a resolution of up to 1,600 x 900 pixels instead because of 1,280 x 800 pixels as in regular models.

Sony VAIO Z-Series is a mix of Sony's 'eye-catching' style and rugged design. The "G-Sensor" shock protection system will limit the risk of data loss when an unexpected collision occurs while on the move to the user. The price may be a bit 'hard', \$ 1,800 (about 32 million) but with the Intel Centrino Core 2 Duo processor, the Sony VAIO Z-Series will be a perfect suggestion for entrepreneurs to choose laptops for his rolling trip.

4. Panasonic Toughbook T8

It costs \$ 2,099 and supports a 12-inch LVD screen. The Toughbook T8 weighs only 3.3 pounds (about 1.4 kg) and also has a body made from magnesium alloy that provides durability. If your work both requires movement and is affected by harsh environments, but requires a high processing configuration like construction engineers,

this will be an appropriate choice.

5. Acer Aspire Timeline AS3810T

Timeline AS3810T has a slim, light design and an attractive selling price of \$ 899. It supports 720p HD quality webcam while most laptops on the market only stop 1.3 megapixels. The device weighs 1.63kg and is only 1.3 inches thin and the 13-inch screen supports the ability to display images at 16: 9 ratio.

In addition, Acer Aspire Timeline AS3810T supports most of the necessary connection ports for users: 3 USB ports, HDMI and VGA, Ethernet ports, headphones and mic and a 5-in-1 card reader, connect WIFI.

Timeline 3810T uses Intel Core 2 Duo processor, 4GB RAM and runs on Windows Vista Home Premium operating system. Battery used for more than 8 hours is also an advantage for Timeline 3810T to become the first choice for entrepreneurs when it comes to moving to solve business.

6. Dell Latitude E5400

At a price of \$ 699, the Dell Latitude E5400 will suit customers who are interested in the same processing capabilities and work support features and attractive price of the machine rather than the flashy fashion design. It has a 14.1-inch screen, uses an Intel Core 2 Duo T7250 processor at 2 GHz and runs on Windows Vista Home Basic SP1 operating system and 160GB hard drive capacity.

7. Apple MacBook Air

If you are looking for a laptop that attracts everyone's eyes with a luxurious look and compact design for travel, the Apple MacBook Air is a smart choice. The device has the lowest price of \$ 1,499, the design is only 0.76 inches thick and weighs 3 pounds.

8. HP TX2Z

The device is priced at 1,149 USD (about 21 million VND) with a screen that can adjust 12.1 inches. The multi-touch LCD touch screen of the device allows you to quickly and easily adjust functions with a stylus or hand to make notes on things that need attention on the device. Built-in webcam with built-in microphone helps users to see beautiful and sharp images while talking over the Internet. In addition, when you use the HP TX2Z you also contributed to the protection of the earth because the LED screen of the screen has no mercury.
