

Which smartphone is the most durable?

Recently, Tom's Guide site has purchased all the latest, most popular smartphones in the US for durability testing by drop drop method. This smartphone's durability test costs more than \$ 18,000.

Recently, Tom's Guide site has purchased all the latest, most popular smartphones in the US for durability testing by drop drop method. This smartphone's durability test costs more than \$ 18,000.

Tests on the test are mainly based on the user's daily routine including dropping at a height of about 1 meter into the toilet bowl, dropping at a height of 1.2 to 1.8 meters to the surface. concrete or wood face with a collision surface from the edge of the machine, the glass surface to the back. The device will be rated for durability, if completely broken, will be removed.

As a result, the top position of the most durable smartphone belongs to Motorola Moto Z2 Force (\$ 500) with 8.5 points, the second position belongs to LG X Venture (\$ 329) with a score of 6.6 points. This device passed the test that fell to the concrete floor (still intact) but due to its lack of water resistance it failed at the test of falling to the toilet.

Test drop drop iPhone X.

Apple's iPhone X (\$ 999) ranked third with 6.2 points, followed by the LG V30 (810 USD - 6.2 points) and Samsung Galaxy S9 respectively (720 USD - 6 points). It is noteworthy that the iPhone SE still has a high durability, which is in the top 10 with 3.9 points released since 2016. These phones all pass the test of falling into toilet toilets thanks to their water resistance.

Phone	Toughness Score (Out of 10)
Motorola Moto Z2 Force	8.5
LG X Venture	6.6
Apple iPhone X	6.2
LG V30	6.0
Samsung Galaxy S9	6.0
Motorola Moto G5 Plus	5.1
Apple iPhone 8	4.9
Google Pixel 2 XL	4.3
Huawei Mate 10 Pro	4.3
OnePlus 5T	4.3
Samsung Galaxy Note 8	4.3
Apple iPhone SE	3.9

Ranking of high-end smartphones in the US (10 is the highest score).
