Who is Mephisto in Marvel's Ironheart?

Mephisto, as seen in Ironheart, is Marvel's version of the Devil from the Bible. However, here, he lives not in Hell but in another dimension where he rules over demons that are the souls of those he has made a pact with. Like the Devil from the Bible, Mephisto can see into people's deepest, darkest desires and then grant their wishes in exchange for a price, which is their soul to add to his demonic army.

However, the wishes he grants are often quite bizarre. For example, consider what happened to Parker when he fell under Mephisto's influence and wore the Hood for too long. Parker lost his friends, his brother, and even his humanity in his pursuit of the riches Mephisto promised.

Sacha Baron Cohen played Mephisto in Ironheart and there's a good chance he'll reprise the role in the MCU.
