When you go to TikTok to record videos or take photos, the app always has a 'makeup' section available. This part will help you become more beautiful, cuter and create many impressive videos or photos. Especially in cases where you haven't had time to apply lipstick or makeup but need to take photos or record videos on TikTok. However, many users are complaining that the makeup is nowhere to be seen. Why doesn't TikTok have a makeup section? TipsMake will answer immediately!

[Q&A] Why doesn't TikTok have a makeup section?

Makeup is the default item available in the TikTok app every time you take a photo. Therefore, it is difficult for this part to 'disappear' from this application. So, when you can't find the makeup section, it can be due to many reasons such as:

1. Users do not know how to adjust the beauty mode on TikTok. It's like I haven't found the 'Makeup' section properly. That's why you think your TikTok doesn't have makeup.
2. The TikTok app version you are using is too old. The user has not updated so the latest version may also be the cause. Because if it hasn't been updated for too long, TikTok may have some problems and not having makeup is one of them.

Share how to turn on makeup mode on TikTok

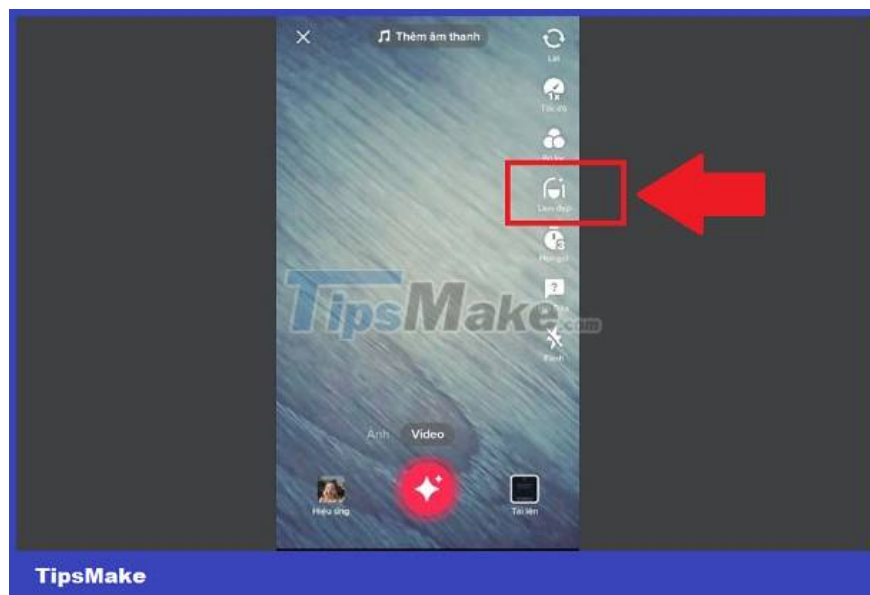

As shared above, TikTok doesn't have a makeup section, maybe you just don't know how to adjust your beauty on TikTok! Therefore, to open this section, you need to follow these steps:

(The steps are performed on the Vivo Y20s phone. Do the same for other phones)

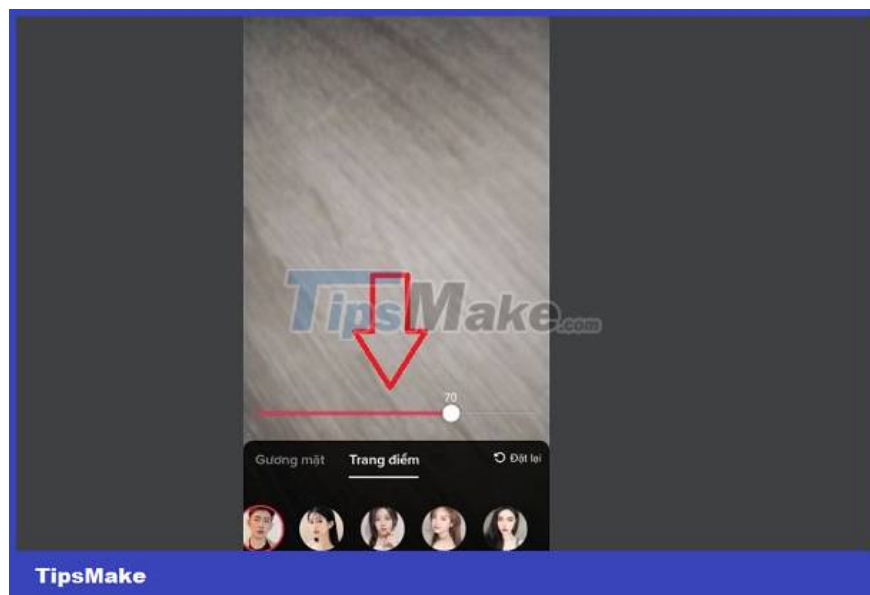

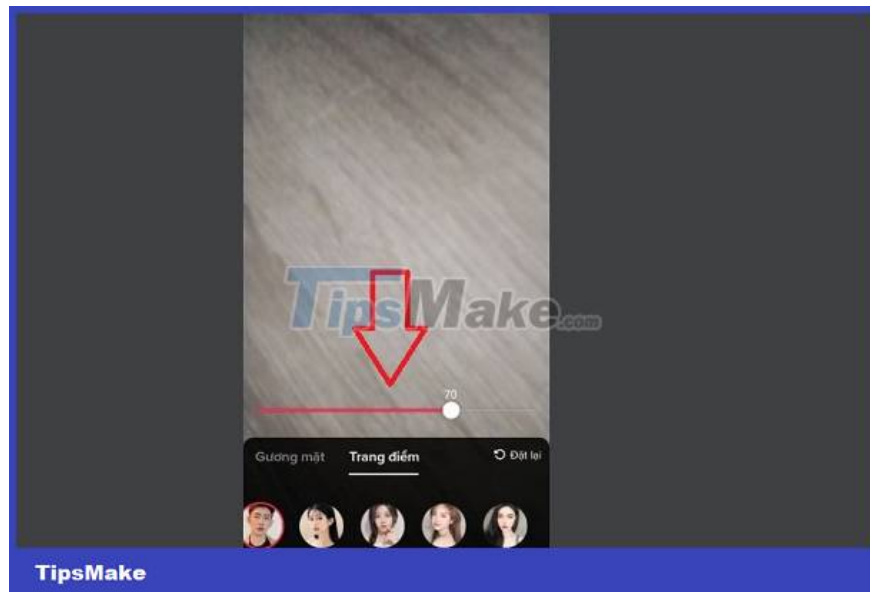

1. Step 1: Go to the TikTok app on your phone > Click the + sign

1. Step 2: After entering this section, choose Photo or Video mode as desired. On the screen, you need to tap on 'Beauty' (Face icon and located below the filter).

1. Step 3: Select the Makeup section and choose the makeup style you want.

Note:

1. On each makeup mode, there is a horizontal scale above to adjust the makeup level. You can drag left (lighter) or right (darker).
2. If you need more detailed adjustments, you can click on 'Face'. There are many parts here for you to adjust such as: smooth skin, slim face, big eyes, contrast, foundation, hair. If you manually adjust but are not satisfied, you can learn how to whiten your skin on TikTok. . Or find pre-existing effects to apply without much tweaking.
3. After selecting the makeup or adjusting it. You just need to click on the capture screen above and start recording/taking photos.

What to do when TikTok doesn't have a makeup section?

If you see that TikTok doesn't have a makeup section, please apply the following measures:

1. Go to the CH Play or App Store app on your phone. In the search bar, type 'TikTok'. Then, if you see an updated version available, update this application to the latest version. The new version will fix problems in the old version, and can also provide many new features for users.
2. If it still doesn't work, you may need to take a more drastic measure than 'reinstalling'. Completely remove the TikTok application from your device > Go to CH Play and App Store to download the application. Once the download is complete, don't forget to grant full permissions so the application runs 'smoothly'.
