

Why is 90Hz screen a top factor when choosing a smartphone in 2020?

A high refresh rate (or refresh rate) screen will become one of the competitive advantages in the smartphone market starting in 2020. However, a screen with a higher refresh rate than 60Hz usually costs nothing. Because of the low price, manufacturers have to really consider because price is a prerequisite for users.

In efforts to deliver a better experience, the duo Realme 6 | 6 Pro was launched with a punched screen with a 90Hz refresh rate and the price is only VND 6-8 million.

What is the frequency of scanning?

The refresh rate or refresh rate is the number of times per second a screen will refresh the image on it, measured in Hertz (Hz). Different from the frame rate (fps - frame per second) of the content displayed, the refresh rate is the property of the screen. Understandably, if you play games at 90fps frame rate without a 90Hz screen, then it is no different and vice versa, if you own a 90Hz screen but the game does not reach 90fps, the new experience is not available.

Realme 6 is the best priced smartphone on the market with a 90Hz screen

With a high frequency of scanning, the device will deliver quality display content, transition effects, smoother surfing and gaming with faster response. Therefore, high-frequency scanning screen is the future of the

smartphone industry, bringing many advantages to the product, especially the mid-range segment like Realme 6.

Realme 6 - the beginning of the battle of high frequency screen

When choosing a phone, not many users are interested in high-frequency panels, but instead the resolution, pixel density. But in 2020, 90Hz displays will be the trend that many smartphone brands choose and Realme 6 is the beginning in the mid-range segment.

The selfie camera is very cleverly placed in the left corner of the screen

Although the 90Hz refresh rate screen has a higher production cost than the usual 60Hz, Realme has quickly gained popularity under the price of 6 million dong. This is an effort to enhance the experience for users in accordance with the criteria that this brand has set since its inception. In addition to the smoothness values, compatible with gaming, Realme 6 also features a punched screen with a dedicated selfie camera right on the screen.

Cleverly placing a small dot for the sensor in the left corner of the screen will ensure a display space integrity with Full HD + resolution, compact. Even when playing games or entertainment, the position of the selfie camera will not affect too much the content displayed, not as uncomfortable as in the middle or rabbit ears, water droplets before.

Apart from the screen, Realme 6 is nothing more attractive to users?

Realme 6 possesses beautiful design, youthful but no less certainly thanks to the extremely high quality of convenience. Besides, performance is also the most outstanding feature on this product with the powerful Helio G90T processor, dedicated for Gaming. 4,300 mAh battery capacity, integrated fast charging technology VOOC 4.0 with 30W output power helps the machine can charge from 0-100% in 60 minutes.

Realme 6 is really worth the possession right now

In addition to the 16MP selfie camera placed in the screen at the front, Realme 6 owns a 4-camera system on the back including a 64MP main sensor, an 8MP ultra-wide-angle sensor, a 2MP black-and-white sensor for depth and macro sensors. 2MP. Realme 6 promises to be a cameraphone for users to choose thanks to the quality has been confirmed recently.

Obviously, the 90Hz screen brings a significant advantage to the visual experience on the screen and Realme quickly popularized this technology for less than 6 million VND on Realme 6. Besides, Realme also launched Technology Roundtable - Real Me, Real Talk, video series format broadcast on Youtube channel of Realme Vietnam. Technology Roundtable, is the place where technology enthusiasts such as reporters, reviewers, photographers, gamers . can sit together, be themselves and tell their feelings and experiences. .

Realme wants these videos to be able to connect with audiences and users through interesting topics around the development trend of smartphones, application technologies and upgrades on the Realme 6 - 6 Pro product duo. . The program aired episode 1 of April 14 https://www.youtube.com/watch?v=cMIq94_nTE with screen theme. The next episode will air on April 21!
