The flashing video call icon on Messenger is something you can see when using this App. So what is the meaning of this phenomenon, is it dangerous?

What is the flashing video call icon on Messenger? Why?

Have you ever seen **the video call icon flashing on Messenger** ? In fact, this is a completely normal phenomenon. When you learn about it, you will realize countless interesting things about Messenger software.

Reasons why the video call icon flashes on Messenger

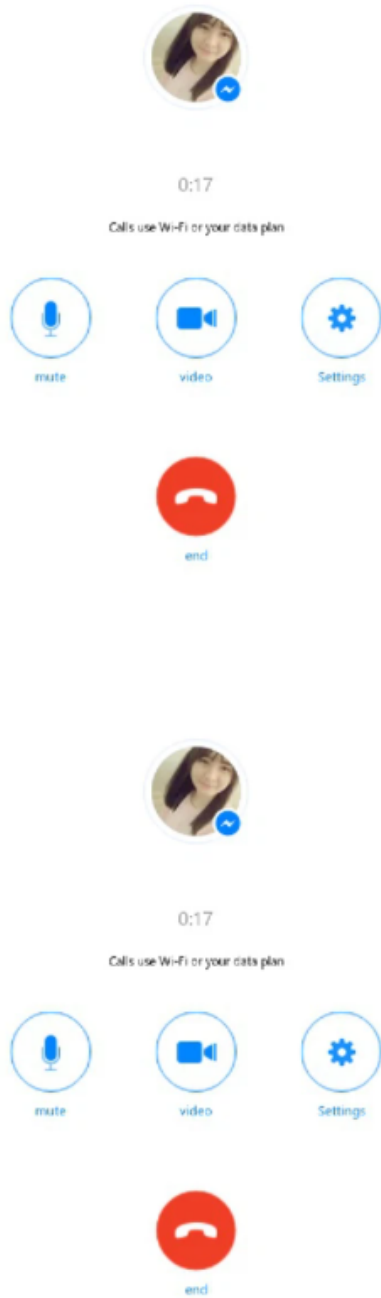

When using Messenger, you will sometimes see *a green dot* appear next to the camera icon, and sometimes the Call Video icon flashes continuously. In fact, if you discover its true meaning, you will be extremely surprised.

? What is the flashing video call icon: This is a sign to evaluate whether the other party is ready to receive a video call or not. In addition, it also shows the concentration of the person talking to you.

? The camera icon flashes and spreads: The other person is still in the conversation with you. In case it is replaced by a green dot, the person has left the chat but is still online.

Therefore, when the flashing icon spreads, you will receive a reply to the message immediately when sent. If you see **the camera icon on Messenger blinking** continuously, it means they are only chatting with you. If this icon sometimes flashes, sometimes turns green, they are chatting with many people at the same time.

In case you see *the Messenger icon flash* for a moment and then *turn green*, they just saw your message but are busy so they have to log out immediately. If there are no signs above, it means that person is not online at all.

Some facts about Messenger application

In addition to the meaning of the flashing video call icon on Messenger, you will be quite surprised to discover a few small truths behind this application:

You are not required to have a Facebook account to use Messenger. Just download the application or visit the website, log in with your phone number. That's why when you log out of Facebook on your phone, your Messenger account still won't log out.

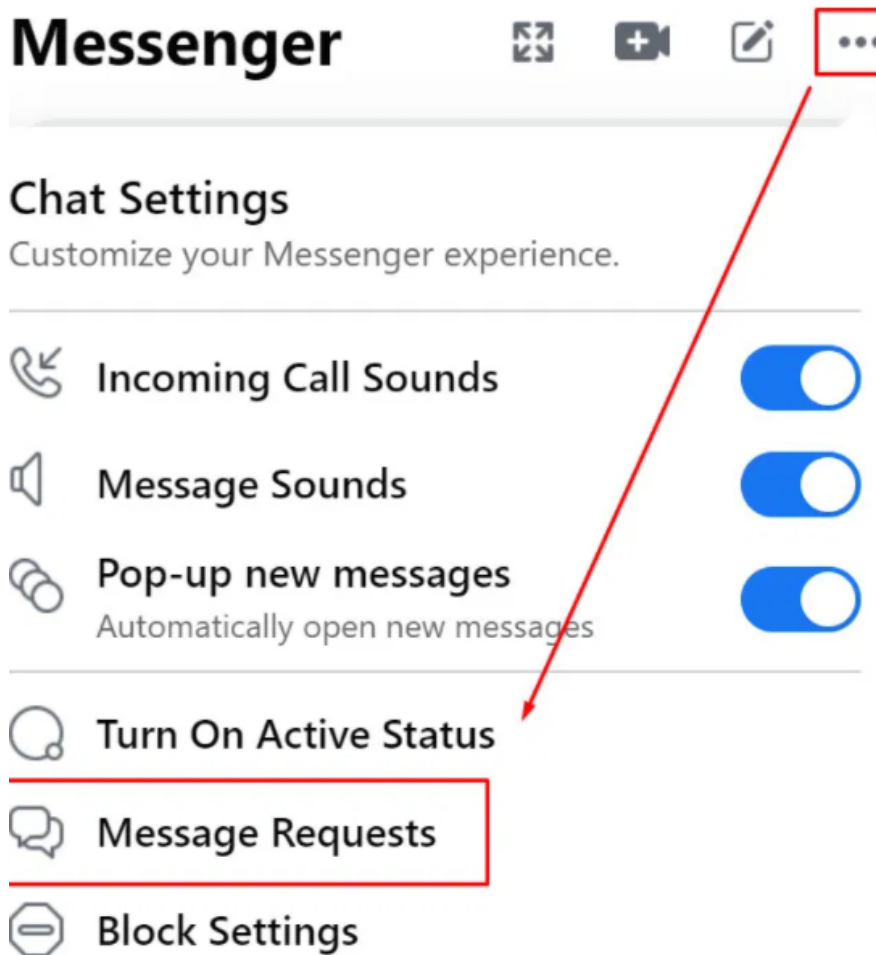

If you use a phone with the Android operating system, you can absolutely use multiple Messenger accounts at the same time. You just need to select '**Accounts**' (multiple accounts), this is extremely convenient. Each

account will be kept private, you can only read messages when accessing the corresponding account.

Messenger has a dedicated web application for computers, it is clean and does not display ads like on Facebook.

In addition to sending messages, Messenger also allows you to make video calls completely free

To prevent spam, Messenger will not display messages from strangers, it will be placed in the 'Message request' section. You can completely read them through the following operations: **Me -> People -> Message Requests -> See filtered requests.**

Messenger
