### 1. What is a water swab?

The simple water swab is the water toothpick. The machine is composed of water pump motor, water tank and spray head. When the engine performs pumping, the water will go from the reservoir to the spray head, then the water jet is sprayed with a certain pressure to clean the teeth in the teeth, bacteria, plaque. In addition to the ability Cleaning, water swab also has a massage function thanks to the impulse of water, which helps to improve dental health better for users.

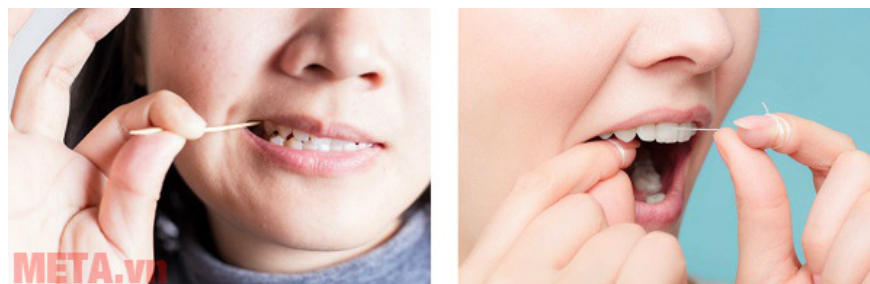

The mouthwash cleaning machine thanks to the pulse of water.

## **2. Is the water swab more effective than bamboo toothpick and dental floss?**

Bamboo and dental floss are two traditional interstitial cleaning methods commonly used in our country. Bamboo toothpicks have been used for a long time, and dental floss also gradually becomes an indispensable oral cleaning product for young people.

However, bamboo sticks are usually hard, sharp, can cause pain, bleeding in the floss, and can not clean leftovers in the deep or small teeth. Long-term use of toothpicks also causes teeth to become larger, teeth become thin, not only to lose aesthetics but also cause damage to the gums and halitosis.

Dental floss is small, soft, has good cleaning ability and less damaging than bamboo toothpick, but with deep jaw areas, dental floss cannot be cleaned. In particular, many people feel that dental floss is difficult to use.

Effective water cleaner, safer than bamboo toothpick and dental floss.

Water swab has a simple operation mechanism, and uses the force of water, so it has a powerful cleaning ability, does not cause pain, cleanses deeply in the teeth and even the jaw area of ??toothpick or dental floss. hard to reach. In the process of using, water swab machine does not cause harm to the gums, it has outstanding cleaning effect, so it can limit many dental diseases. This device is also particularly suitable in case of planting teeth, braces, gingivitis .

### 3. How to use water cleaner?

How to use the water swab is very simple. Just put the tip in your mouth and choose the appropriate mode. **Water swab machines should be used 1 time per day .**

Simple water swab machine.

However, it should be noted that water toothpicks only replace toothpicks and dental floss so users still need to maintain brushing regularly 2 times a day and periodically visit a dentist to ensure oral hygiene.

### 4. What kind of water swab is available?

Water purifiers have 2 main types: **wired** and **wireless** .

Máy tăm nước có dây

Máy tăm nước không dây

Water dispenser has 2 types of wired and wireless.

1. **Wired water toothpick machine:** usually large in size, durable, suitable for the whole family.
2. **Wireless water swab:** 1/2 to 1/3 small compared to other types of wired machines, can be carried while traveling for business or travel, very popular with young people thanks to convenience and mobility. .
