## 1. Timer to turn off and turn on the television

As we know, most of the current TV series integrate the timer feature to turn off and turn on the TV according to the time you set. As a result, you will not miss attractive movies and entertainment programs with fixed broadcast hours. In addition, it also helps you save electricity for the TV if you accidentally oversleep.

And to use this feature, of course you have to set the correct date and time for Smart TV. Your TV will turn on and off based on the time it was installed on the TV.

## **2. Ensure that TV applications run stably**

Smart TV brings a very diverse entertainment app store, you can install your favorite applications on TV to experience. However, many applications (eg YouTube, Facebook, etc.) usually only work when your TV is set to the correct time zone.

Typically on Android TV Sony or Android TV TCL, if you do not set the time, the correct time zone for the TV, sometimes you will not be able to access YouTube to watch the video.

1. TV does not access YouTube / Facebook, this is the cause and remedy

## **3. Some notes when setting the date and time for the TV**

Make the date and time settings for the TV, remember to select the time zone to be GMT +07: 00 and have to adjust the date section to match the actual date and time.

Television usually has automatic date and time mode, but in some cases the TV may take the wrong time. Therefore, it is best to check again to make sure, if you find the wrong time, please switch to setting the date and time manually (manually) so that the process of using the TV is not affected.

So, do you know how important it is to set the date and time for televisions? Hopefully the article has provided useful information to help you get more experience using Smart TV more effectively.
