

Why should you buy Sunhouse SHR76210CK integrated RO water heater?

Sunhouse SHR76210CK 10-core RO water purifier filters all water sources, integrating hot and cold water, low waste water so customers are very confident in buying and using.

In RO water purifiers, RO water purifier integrated with Sunhouse SHR76210CK 10 core heater is highly appreciated by users. Let's take a closer look at what Sunhouse SHR76210CK RO water purifier has to stand out, but it is so believable.

Why buy RO water purifier integrated with Sunhouse SHR76210CK 10 core heater?

Sunhouse water purifier filters many different water sources, suitable for home use.

Sunhouse SHR76210CK can filter many water sources such as tap water, well water, alum, acid water. However, for acidic or acidic water sources, it is necessary to filter raw water before entering the water purifier.

Quick filtering capacity meets the demand for family use. RO water purifier equipped with 2-way water pump also helps to pressure water to pass through medium-sized membrane can suck water into the machine. In addition, this pump can absorb water up to 3m deep, very suitable for families using a lot of water or weak pressure areas.

SHR76210CK equipped with automatic water connector for safe use

Filters of water purifiers equipped with automatic couplings prevent water leakage for greater durability and high safety when used.

Equipped with up to 10 filter cores for ultra-clean water filtration efficiency

Compared to other RO water purifiers on the market, Sunhouse SHR76210CK has the most filter cores. Each filter core will have its own functions:

1. Filter core 1 has the function of removing soil mud, rust, crude impurities, heavy metals, arsenic . with dimensions ? 5 μ m.
2. No. 2 filter absorbs heavy metals, organic substances, detergents, toxic chemicals.
3. Filter No. 3 removes dirt, rust, raw impurities, heavy metals . with dimensions ? 1 μ m.
4. Filter # 4 (RO membrane) eliminates completely solids, heavy metal ions, microorganisms, bacteria, viruses, organic substances that make the water completely pure but not made change its physical and chemical properties.
5. Filter number 5 to balance pH, eliminate odors, create minerals and sweetness of water, kill bacteria and fungi in water.
6. The 6th filter has the function of infrared radiation, separating water molecules, increasing the amount of oxygen to water to help water circulate easily in the body, reduce the aging process and avoid dry skin.
7. Filter No. 7 helps increase alkaline water pH (7.2 - 7.4) to help neutralize excess acid in the body.
8. Filter No. 8 (maifan stone) contains 45 types of minerals that are beneficial for the body to be applied to dermatological and digestive diseases .
9. Filter No. 9 (Silver Nano) will kill harmful bacteria from the environment.
10. Filter number 10 (ORP core) will make water with a high pH, ??very low electrolyte, support oxidation.

Machine not only has the function of purifying clean water but also helps balance pH, supplement minerals, kill bacteria to bring a good source of water for health.

Sunhouse RO water purifier offers a high rate of clean water, low rate of waste water

The machine uses RO membrane imported from the US to completely remove heavy metals, microorganisms, bacteria, viruses, organic substances, solids that help purify the water completely.

This RO filter also works to improve filtration performance with a filtering capacity of up to 10 - 15 liters / hour, which saves water and saves energy. For example: If filtering 10 liters of water, the machine will produce 6.5 liters of clean drinking directly and 3.5 liters for washing dishes, washing clothes, cleaning houses .

It has the function of making hot / cold water

Not only does Sunhouse SHR76210CK purify water but also function as a hot and cold water plant. In which, the capacity of hot water is 0.85 liters, the heating capacity of 580W helps to heat water quickly with hot water temperature reaching 85-90 degrees C. Refrigerant capacity of 0.65 liters, cooling capacity of 70W , can cool water at a temperature of 5-10 degrees Celsius.

These two features are essential for you to use milk, make noodles or drink cool water to cool off on hot days.

Filtered water with RO Sunhouse water purifier can be taken directly without boiling

The water source after filtering is extremely pure, clean bacteria, balanced pH and contains many natural minerals that are good for health so it can be poured into a drinking cup without boiling so you don't have to boil water with warm water. super speed.

Integrated water storage pressure

The device comes with water pressure filter to help your family always have clean water available for drinking or cooking.

These are extremely convincing reasons that explain why you should buy Sunhouse SHR76210CK integrated RO water heater. So why wait any longer but do not immediately buy your family a RO Sunhouse RO filter to protect your health.
