

# Wi-Fi pass with Mathematics makes people want to go crazy, you can find the answer

In fact, many people have thought that wifi pass is a problem with a series of calculation formulas to some pages and if you are blind about math, then let's not use wifi.

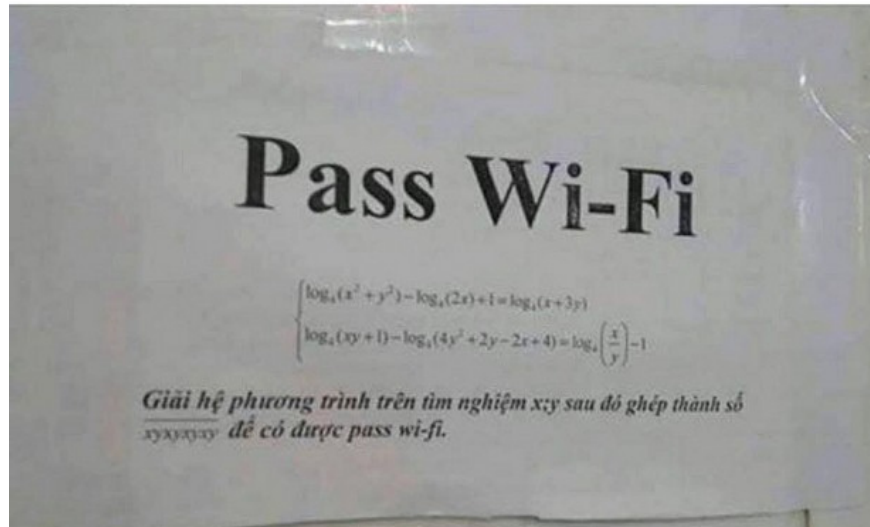

If you think the game of setting wifi pass is misleading as 'wifihongroi - wifi is broken', 'yeuthicho - love, then give', 'emdepkhong - you are beautiful' . is already too popular. In fact, many people have thought that wifi pass is a problem with a series of calculation formulas to some pages and if you are blind about math, then let's not use wifi. And below are the wifi pass that makes people so crazy.

When traveling in Thailand, this guy encountered a monstrous restaurant with a sea of ??announcements below. Immediately this guy had to go to Reddit to ask for help.

Pass wifi to challenge new employees without being good at math. Certainly it will make more people use 3G than sit the prize.

😂😂😂😂 Các a/c giúp e với nhân lúc nghỉ trưa?  
Ko e chớt mắt, sáng tới giờ toàn dùng 3G thui, e mới xin vào  
làm kt công ty mới. Sáng đi làm buổi đầu tiên...

After asking for help on Facebook social network, an enthusiastic netizen helped the girl find the wifi pass.

Date

No.

Pass wif:  $\begin{cases} \log_4(x^2+y^2) = \log_4(2x) + 1 = \log_4(x+3y) \\ \log_4(xy+1) - \log_4(4y^2+2y-2x+4) = \log_4\left(\frac{x}{y}\right) \end{cases}$

$\Rightarrow \forall x, y > 0$

$$(1) \Rightarrow 1 = \log_4 \left[ \frac{2x(x+3y)}{x^2+y^2} \right]$$

$$\Rightarrow \frac{2x^2+6xy}{x^2+y^2} = 4$$

$$\Rightarrow 2x^2+6xy = 4x^2+4y^2 \Rightarrow x^2-3xy+2y^2=0$$

$$\Rightarrow \begin{cases} x=y \\ x=2y \end{cases}$$

$$(2) \Rightarrow x = \log_4 \left[ \frac{x(4y^2+2y-2x+4)}{y(xy+1)} \right]$$

$$\Rightarrow \frac{4xy^2+2xy-2x^2+4x}{xy^2+y} = 4$$

$$\Rightarrow 4xy^2+2xy-2x^2+4x = 4xy^2+4y$$

$$\Rightarrow 2xy-2x^2+4x-4y=0$$

$$\Rightarrow 2x(y-x) - 4(y-x) = 0$$

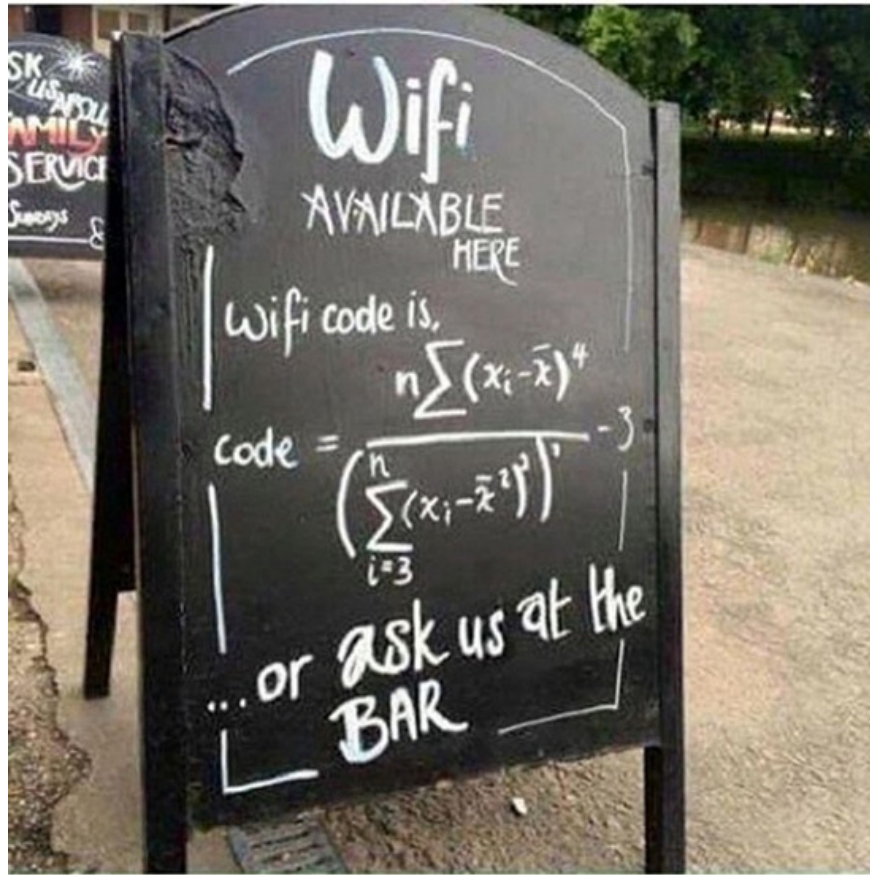

$$2(y-x)(x-2) = 0$$

$$(a) \begin{cases} x=y \\ x=2 \end{cases}$$

Nếu  $x=y \Rightarrow$  luôn đúng  $\Rightarrow \emptyset$  vô pass

Nếu  $x=2 \Rightarrow y=1 \Rightarrow$  PASS: 2+2+2+2+1

Looking at it, I want to faint, thankfully, the last sentence was saved.

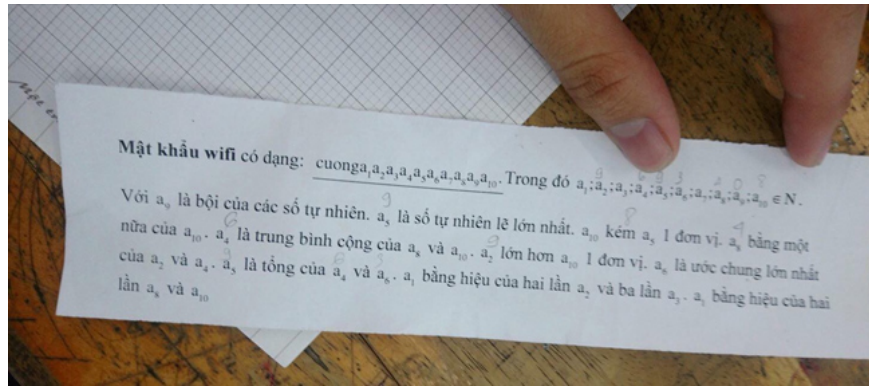

*WiFi password is . or ask us at the counter*

*Take this to get a pass.*

A wifi pass with super-long math made in Vietnam made people want to get mad and would rather accept 3G than sit in prize.
