

# With just two vertical lines, this GIF image has turned into an impressive 3-dimensional image like this

By simply adding two vertical lines to the appropriate GIF image, we can create a fast and impressive 3D effect.

By simply adding two vertical lines to the appropriate GIF image, we can create a fast and impressive 3D effect.

After creating, the virtual 3D GIF image will have 3 layers: after the line, the line and the line. At this point, the viewer's brain will create the illusion that everything in the picture is separated by lines, everything in front will be closer.

Here are some amazing virtual 3D GIFs, please admire.
