## Fix Fatal Error in Wuthering Waves

### Fix Fatal Error with tools available in the game

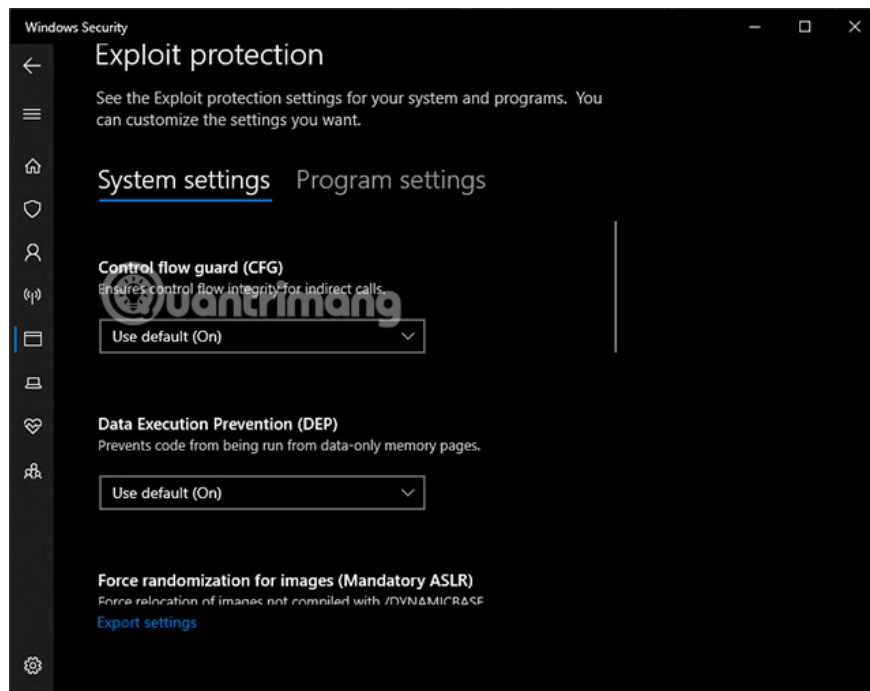

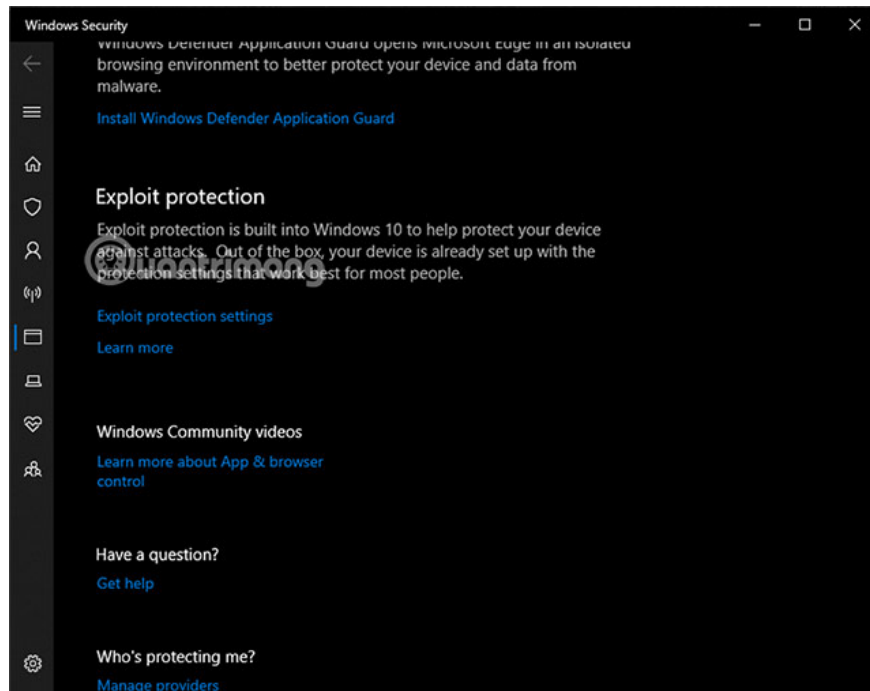

Fatal error (WUWA) can be resolved by repairing game files. But first, you must completely turn off the game, by turning on Task Manager, selecting the Processes tab > right-clicking on Wuthering Waves and then selecting End Task to turn it all off.

After that, restart the Wuthering Waves launcher and click on the wrench icon (repair icon) in the upper right corner. A window will display and confirm whether you want to fix errors or not, select fix errors and there will be a launcher that checks for corrupted files and replaces them and can fix the game error.

### Turn off the Control Flow Guard feature

CFG is a security feature in Windows that can sometimes interfere with the game launch system. So it can cause game errors, to turn off this feature, go to Settings > Update & Security > select Windows Security, then select Application and browser control (App & Browser Control).

Once you get here, look for the Exploit Protection setting. From there, locate the CFG option and turn it off. Once done, restart your computer and try running Wuthering Waves again.

## Install the latest version of Microsoft Visual C++

Just by installing Microsoft Visual C++, you can fix the Fatal Error. Visual C++ is a necessary component to run many different software on Windows, including games.

And when your computer does not have the latest version of Visual C++, it can cause problems leading to game errors. You can download the latest version of Microsoft Visual C++
