

WWDC 2019: tvOS new version, more features to support users

After launching the revised Apple TV app last month, today, Apple has officially updated some of the new changes and features for the software platform running on the Apple TV streaming box: tvOS (tvOS 13).

After launching the revised Apple TV app last month, today, Apple has officially updated some of the new changes and features for the software platform running on the Apple TV streaming box: tvOS (tvOS 13). . On the stage of WWDC this year, CEO Tim Cook announced several changes and improvements to the tvOS platform. Among them, the most prominent is probably the redesigned main screen with content previews displayed in a richer full screen format. However, there is another news that is even more important, Tim Cook said that tvOS will be adding features to support multiple users with personalized recommendations for each family member or group. separate user. This feature will apply to both Apple TV and Apple Music applications.

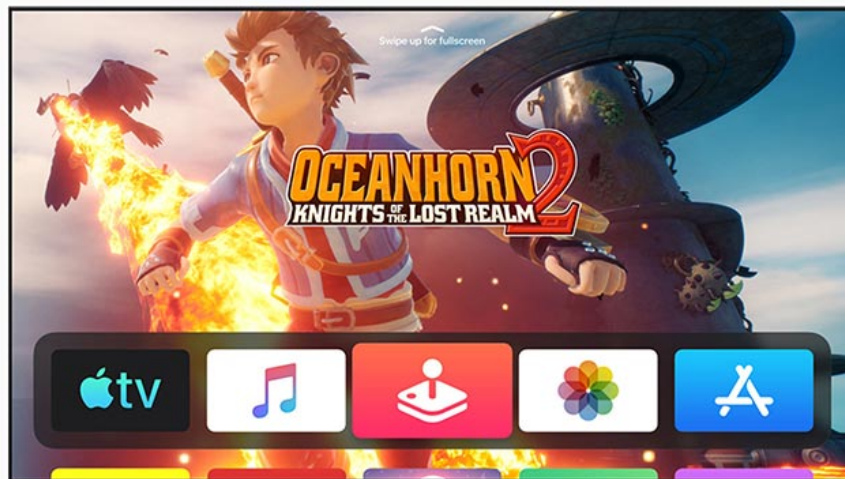

1. Apple WWDC 2019: Mac Pro, iOS 13, Marzipan and what to expect at the biggest technology event of the year for Apple?

More specifically, each user will be suggested with different videos according to their habits. The conversion of user accounts can be done quickly via the new Control Center feature that appears on tvOS 13. Besides, the Apple Music application will also be slightly improved, which can display the lyrics. correctly synchronized according to the currently playing music track.

1. macOS Catalina, the new operating system for Mac computers, has just been announced by Apple

In addition, when officially launched for users this fall, tvOS 13 will also be adding support for gaming console models such as Xbox One and PlayStation 4. Thus, you will be able to use your hands. hold of Xbox One and DualShock 4 on tvOS 13 with full functionality. In fact, the platform previously supported connecting various gaming handles via Bluetooth, but it is clear that the majority of users are familiar with using gamepads from two popular gaming systems. this. The Xbox One and DualShock 4 handle support features are released to facilitate games on Apple TV (including Apple Arcade games to be released later this year) to reach users. easier.

1. Apple introduced iOS 13, supports dark background mode, opens apps twice as fast and many new features

In the framework of WWDC last year, Apple announced that the new version of tvOS will be added to support Dolby Atmos sound effects and the new 'Zero Sign-In' login feature - designed to allow Online streaming applications from cable networks can automatically log in when used on a user's home Wi-Fi network. And these features will be officially available on tvOS 13 here.

1. WWDC 2019: watchOS 6 officially launched with many notable improvements

WWDC 2019 officially opened on Monday, June 3. The event will take place within 4 days and close on Friday, June 7 here. Please pay attention to follow up.
