

# Xiaomi designed a new smartphone: 2 selfie cameras at the edge of the bezel

Xiaomi's new smartphone is designed with a selfie camera placed in the upper two corners of the screen.

Smartphone screens are one of the aspects that smartphone manufacturers have focused on developing in recent years to meet the increasing demands of users. A series of different solutions have been proposed by smartphone manufacturers such as notch design, 'water droplets' . to have a full screen design on the front.

Recently, Xiaomi has launched a new, very strange solution that brings a completely different design to its new smartphone. Specifically, Xiaomi's new smartphone is designed with a selfie camera placed in the two upper corners of the screen.

Xiaomi has implemented four different designs on how to put the dual selfie camera cluster on the front. The difference in these 4 types of design is how the border around the camera sensor. One of them has a fingerprint

sensor on the back.

The cameras are located in a strange position but still reasonable, quite optimal in terms of space. The rear camera cluster of these 4 designs has a few small changes but nothing new.

It is known that these are photos of Xiaomi's design patent file that were granted by the Hague international design system. And since this is just a patent, it is not known if Xiaomi will make it in the future. Only time will tell us the exact answer, so let's wait and see.

1. All smartphones released after January 31, 2020 must have Android 10 pre-installed
2. Watch the video of opening Xiaomi Mi Mix Alpha box, quality from machine to boxed
3. The most durable tempered glass on the smartphone market of the iPhone 11 Pro shattered after a light fall on the Apple Store
