

Xiaomi launched a wireless handheld juicer

Xiaomi's Zhenmi juicer has a quite compact design, which makes it easy to carry and use anytime, anywhere, especially when traveling.

Xiaomi launched the MIJIA juicer in July last year and received a lot of positive feedback from users, with more than 3 million people participating in fundraising in less than a month. Recently, Chinese manufacturers have just launched an improved version of this product, full name is Zhenmi Wireless Vacuum Juicer.

Zhenmi wireless juicer possesses a unique design with an oval cup body, which not only ensures aesthetics but also provides a comfortable grip for users.

Products have two color options are Pink (Cherry Pink) and Blue (Light Blue). The machine is equipped with a 4-leaf stainless steel blade, combined with Eccentric Spoiler technology to increase the attack force up to 35%. As a result, users do not need to shake the device whenever they want to juice. It is even advertised as being capable of grinding rock.

The Zhenmi wireless handheld juicer has a fast water injection function, which can be easily activated with the press of a button. In this mode, users only need to wait 28 seconds to get a cup of juice, while traditional juicer models take up to 40 seconds.

The product uses 301 stainless steel blades and environmentally friendly PC + ABS plastic materials. In addition, you can also wash the body of the cup and the brush head easily without fear of damaging the electronic components inside, because they have a 100% waterproof and leak-proof design.

As the name implies, the wireless handheld Zhenmi juicer also has a vacuum function that is used to clean the device after each use. It can remove air in just 15 seconds, thus preventing oxidation of the leftover fruit residue inside.

On the other hand, the product can also maintain a pressure of -30kPa for 4 hours, ensuring the food inside the body is always fresh, even if you do not need it immediately.

The Zhenmi wireless handheld juicer comes with a 2400mAh battery which, according to Xiaomi, can squeeze up to 25 cups of juice continuously after a full charge. Users only need to attach the cable to the top of the device to charge, and the product also supports charging via backup charger or car charger, full battery in just 2 hours.

Xiaomi's new juicer is currently being sold on the Youpin crowdfunding platform with a fundraising price of 199 yuan (about 650,000 dong), expected delivery from April 19. After the fundraising period expires, it will be sold at a retail price of 239 yuan
