

## Xiaomi launched smart ceiling light cum heater, priced at only 2.7 million

Like other Xiaomi products, the new smart heating lamp can also be connected to smartphones via the MIJIA app, making it easy for users to adjust the light intensity and heating temperature according to their needs.

Xiaomi has just launched an interesting new product on the Youpin crowdfunding platform on March 5. This is a model of smart ceiling lights, cum heaters for families.

It comes in two different versions, a square one sells for a fundraising price of 799 yuan (about 2.7 million dong) and a rectangular version costs 999 yuan (about 3.4 million dong). After the fundraising period expires, the two products will be sold at retail prices of 1799 yuan (about 6 million dong) and 1999 yuan (about 6.7 million dong).

In addition to meeting the lighting needs of your home, Xiaomi's new smart lights can also bring you warmth. According to the manufacturer's announcement, this lamp can warm the air after only 3 seconds from being turned on, operating completely quiet and does not cause unpleasant noise to the user.

The lamp is equipped with a heating plate with a compression-type design, which increases up to 20% of the heating area and has a fast heating speed. In addition, the product is also durable, not deformed even when operating under temperatures up to 400 degrees C.

Xiaomi's intelligent heating lamp uses far-infrared heating and does not have a fan, thus limiting the drying of moisture in the air, bringing comfort to the user and much better than that. Traditional heater models use incandescent light bulbs.

The square version of this heater is 60cm long, 60cm wide and 12cm thick. It is equipped with 80W LED bulb with heating capacity up to 1000W. Meanwhile, the rectangular model has dimensions of 90cm x 60cm x 12cm with 120W LED, 1300W heating capacity.

Speaking of lighting, Xiaomi's smart lights have LED lights that are uniformly and reasonably arranged, helping to illuminate your room without ghosting, light loss due to the body of the lamp. hidden and not dazzled. Lamp cover is made from thick PC plastic, precision machined, with uniform thickness, durability and high light transmission.

Like other products in Xiaomi's ecosystem, users can connect this new smart heating lamp to the smartphone via the MIJIA application to adjust the light intensity and heating temperature according to the needs. use. In addition, you can also control the light using Xiaomi's intelligent voice assistant XiaoAI.
