

Xiaomi launched the mop cum Deerma dust mop, priced at only VND 330,000

Thanks to the humidifying mist system, Xiaomi's new Deerma mop will help you to clean up to where it is, where it's dry and extremely safe for children.

Besides making smartphones, Xiaomi also has a huge ecosystem with a lot of different products. Recently, the company has just launched a new model of mop built-in dust scanner on Youpin community fundraising platform, fully named Deerma Sweep Mop DEM-TB900.

Although equipped with many useful features, but the new Deerma mop of Xiaomi has a retail price of only 99 yuan (about 330,000 VND). At the present time, the product is being sold at a fundraising price of 79 yuan (about 265,000 VND) and has attracted a capital exceeding 1500% compared to the original target.

The Deerma Sweep Mop DEM-TB900 features a versatile design, which can switch between mop and dust scanner in a few simple steps, making your cleaning easier than ever.

Every time you clean your house, you will not need to use your hands to directly contact with dirt or pollutants. Thanks to a simple activated humidifying system with a squeeze and drop, Xiaomi's new Deerma mop will help you wipe until it's clean, until it's dry there, extremely safe for children and Don't worry about dampness and mold generation, especially for wood floors.

It has two wheels connected to a mechanical roller and an additional brush. When pushed forward, the roller will rotate and the brush will automatically sweep dust and garbage into the container. The box has a quite large capacity of 230ml, so you do not need to clean it often.

In addition, the product also has a leak-proof design, helping to prevent dirt from inside the box from falling out during use. When you want to empty the trash, simply press the red button on the back of the device, the lid of the container will automatically open and the only thing you need to do is to empty the trash without touching your hands. this dirt.

Deerma Sweep Mop DEM-TB900

The mouth of the horizontal sweeper is made quite wide up to 17cm, enough to "handle" all kinds of dust and debris in your house such as fruit peels, shredded paper, glass fragments. Meanwhile, the bristle brush is made quite soft, can wipe out dirt in every corner easily, even under the cupboard, under the bed .
