

# **Xiaomi launches Mi 9 Pro 5G: Snapdragon 855+ chip, the world's fastest 30W wireless charger, 5G connectivity**

Mi 9 Pro 5G has a strong configuration, supports 5G connectivity and the fastest wireless charging technology available today.

In an event held in China, in addition to the Mi MIX Alpha with an unimaginable design, Xiaomi also launched the Mi 9 Pro 5G smartphone with a powerful configuration, support for 5G connectivity and wireless charging technology. today's fastest wire.

This version is affordable, starting at only \$ 520, is one of the lowest-priced 5G-enabled smartphones in the world today.

The power of Xiaomi Mi 9 Pro 5G comes from the Snapdragon 855+ processor, with 15% higher graphics performance than the old version is Snapdragon 855. It is equipped with 8GB and 12GB RAM, internal memory capacity. 128GB, 256GB and 512GB.

This smartphone has a data download speed of 1.8Gb / s with 5G network.

Xiaomi Mi 9 Pro 5G is equipped with a graphite exhaust and cooling system to help cool the processor and 5G mobile connection.

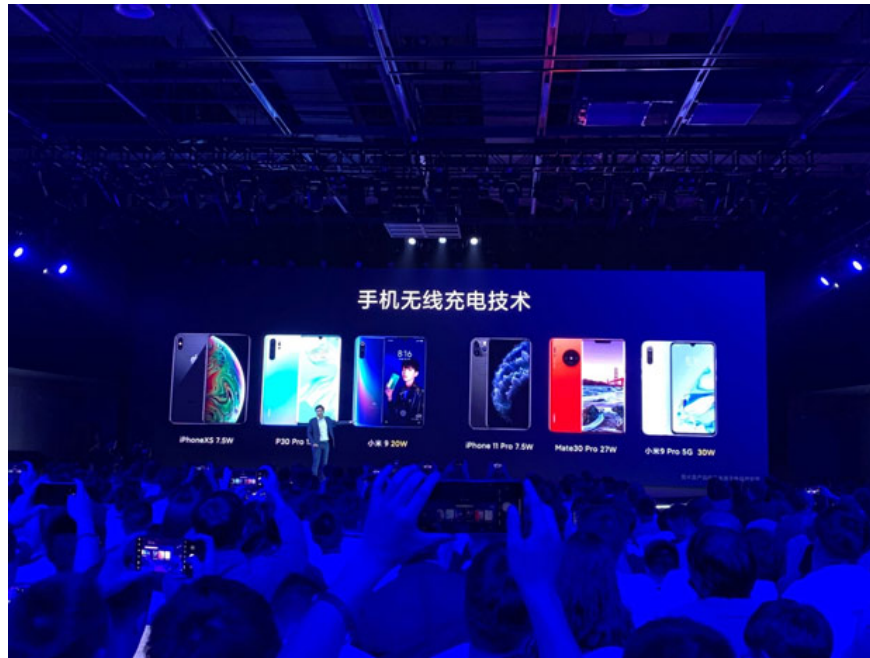

The Mi 9 Pro 5G is also equipped with 30W wireless charging technology and 10W backwards compatible charging, surpassing Huawei Mate 30 Pr with 27W wireless charging to become the smartphone with the fastest wireless charging speed in the world today.

Thanks to this speed, Mi 9 Pro 5G can fully charge a 4,000 mAh battery in just 70 minutes with wireless charging.

With a wired charger that supports up to 45W, this smartphone only takes 50 minutes to fully charge 100%.

The Mi 9 Pro 5G has the same design and other specifications, including the camera as the Mi 9. However, the Mi 9 Pro 5G runs MIUI 11, based on the latest Android 10.

Mi 9 Pro 5 has 4 versions including:

1. 8GB + 128GB version: Selling price of 3,699 yuan (about 520USD).
2. Version 8GB + 256GB: Price 3,799 yuan (about 535USD).
3. Version 12GB + 256GB: Price 4,099 yuan (about 575USD).
4. Version 12GB + 512GB: Price 4,299 yuan (about 605USD).
