

Xiaomi launches RedmiBook 13, ultra-thin bezel, 10th-generation Intel chip, priced from only \$ 597

Xiaomi is increasingly becoming ambitious to take a foothold in the laptop market that's becoming increasingly cramped - based on a strategy that has helped them succeed in the smartphone world.

Xiaomi is becoming increasingly ambitious to take a foothold in the already crowded laptop market - based on a tactic that has helped them succeed in the smartphone world: Launching structured products The screen is tall - the price is reasonable, and the RedmiBook 13 is such a device.

It must be affirmed that RedmiBook 13 is one of the laptops with high-end finishing quality and the most impressive specifications in the segment of about VND 15 million (USD 597).

First talk about design and finishing quality. The entire chassis of RedmiBook 13 is made of premium metal with extremely meticulous finishing. The Chinese manufacturer says it needs more than 500 processing processes to create such a refined body. The most striking in the design of the RedmiBook 13 is probably the perfectly optimized, ultra-thin screen bezel, giving the display rate of 89% - an extremely high level on laptops. In addition to protecting the 13.3-inch Full HD panel, Xiaomi has also added a special bezel system that can withstand a maximum weight of up to 50%. The smart, ergonomic design of the product allows you to quickly open the screen with just one hand.

In terms of configuration, RedmiBook 13 is equipped with a 10th-generation Intel processor, 8GB of RAM and a 512GB hard drive. More specifically, there will be 3 versions for each price level, including:

1. Standard version: Core i5 CPU, 8GB RAM, 512GB SSD (\$ 597, equivalent to 13.7 million VND).
2. Standard version but with additional discrete graphics MX 250 (640 USD, approximately 14.9 million).
3. High-end version: Core i7 CPU, 8GB RAM, 512GB SSD, MX250 (\$ 739, about VND 16.9 million).

Besides the quality of finishing and configuration, battery life is also a strong point to mention on RedmiBook 13. According to the manufacturer's announcement, the battery equipped on RedmiBook 13 can give continuous use time up to 11 hours on mixed tasks, with 50% fast charging in just 35 minutes.

All of these impressive details are packed into a product that weighs just 1.23kg and is smaller than a standard A4 sheet.

Xiaomi has not yet announced the launch date or official price of RedmiBook 13 versions in Vietnam market.
