

Xiaomi launches robot vacuum cleaner and mop in Vietnam

Xiaomi robot has a price range of VND 7.5-10 million, however, it will be reduced to VND 5.5-8 million on the day of sale.

In parallel with Redmi Note 9S, today at its online event, Xiaomi also launched a series of robot vacuum cleaners and mop their homes in Vietnam market. Specifically, the two models introduced by Xiaomi this time are Mi Robot Vacuum-Mop P and Mi Robot Vacuum-Mop.

Mi Robot Vacuum-Mop P is equipped with a Nidec brushless motor with suction power of 2100Pa. The LDS laser routing sensor combined with the SLAM mapping positioning algorithm allows the robot to create a map of the house.

Mi Robot Vacuum-Mop P

Mi Robot Vacuum-Mop P comes with three cleaning modes: Vacuum cleaning mode, Cleaning mode, Vacuum cleaning mode and Cleaning mode. Mi Home application allows users to control the robot remotely and adjust a number of features such as cleaning mode, working schedule, adjusting water level .

Meanwhile, Mi Robot Vacuum-Mop is a shortened version of Mi Robot Vacuum-Mop P. Mi Robot Vacuum-Mop still has the ability to vacuum and clean the house like the expensive version, however it is cut down some sensors (such as the absence of LDS Laser), the battery capacity is also lower and some features such as sweeping by region. In return, Mi Robot Vacuum-Mop possesses a very powerful suction motor with suction up to 2500Pa.

Mi Robot Vacuum-Mop

Mi Robot Vacuum-Mop P genuine price in Vietnam is 7,490,000 VND, while Mi Robot Vacuum-Mop P is 9,990,000 VND. During the launch, Xiaomi will cooperate with a number of retailers in Vietnam to sell a pair of robots at a more attractive price. Specifically, from April 7 to 9, Mi Robot Vacuum-Mop will be reduced to VND 5,490,000, while Robot Vacuum Mop-P will be VND 7,990,000.
