

Xiaomi Mi Band 5 will have a bigger screen, supporting touchless payment worldwide

According to a recent leak, Mi Band 5, the next generation of Xiaomi's smart bracelet will probably receive two much-needed new enhancements, a bigger screen and payment support. Do not touch worldwide.

According to a recent leak, Mi Band 5, the next generation of Xiaomi's smart bracelet will probably receive two much-needed new enhancements, a bigger screen and payment support. Do not touch worldwide.

Specifically, Tizen Help reported that Xiaomi Mi Band 5 will be equipped with a 1.2-inch screen, larger than the 0.95-inch screen on the current Mi Band 4.

Not only is the larger size, the screen of the Mi Band 5 is also higher quality, easier to read under direct sunlight.

Mi Band 5 will also support airless payment in all markets around the world. Earlier, the NFC feature enabled for non-touch payments was only equipped with Xiaomi's Mi Band versions specifically for the Chinese market. It is not clear if Xiaomi will bring its Mi Pay service to the world market or whether it will use payment services from other third parties.

Mi Band 4 is currently one of the most popular smart bracelets on the market.

Not long ago, Xiaomi confirmed that it was developing the fifth generation of the Mi Band health monitoring bracelet but the time of product launch has not been disclosed.

The information Tizen Help gives is for our reference only because they do not specify the source of the source.

1. Huawei launched Band 4 Pro, integrated NFC, GPS, SpO2 blood oxygen sensor, priced at 1.3 million
2. Huami launches Amazfit T-Rex smartwatch with military durability
