

Yahoo Messenger for iPad is available in iTunes Store of iTunes

Until now, no one has surpassed Yahoo with the most popular chat and messaging program called Yahoo! Messenger.

Until now, no one has surpassed Yahoo with the most popular chat and messaging program called Yahoo! Messenger. Right ! Yahoo has expanded its messaging platform to various operating system platforms such as Mac, Linux, Windows, and Android on devices such as PCs, smartphones, and iPhones, and now has an Apple iPad version.

Yahoo Messenger for iPad was officially released on May 18, and you can **download it for** free from iTunes's Apple Store, for more details visit the address. It not only provides Chat service but also allows users to share photos and videos or features to make video calls as easily as on PC. The file for installing Yahoo Messenger for iPad is about 21.4MB, the program window can be optimized in full screen mode.

Video Call feature only supports on iPad 2 for low cost international calls for landline phones and mobile phones and is only available to users in the US, Germany and Singapore.

The best thing is that Yahoo Messenger for iPad also supports multitasking, which means it will notify users if there are new messages even when the app is running in the background. And this program also allows sending free SMS.
