

Yahoo Weather updates with new effects for iOS

Today, Yahoo has just released a new updated version of the weather app on iOS with many effects, high quality images depending on the weather conditions of your area. The update also adds that there will be some improvements in the design specifically for this year's two mobile super products, the iPhone 6 and iPhone 6 Plus.

Today, Yahoo has just released a new updated version of the weather app on iOS with many effects, high quality images depending on the weather conditions of your area. The update also adds that there will be a number of improvements in design for this year's two "super products" that are Apple iPhone 6 and iPhone 6 Plus.

>>> Download Yahoo Weather for iOS!

New animation effects include images of lightning, frost, fog, rain, sun, and other effects already in the previous application. These effects are used by Yahoo using bleeding-edge graphics technology commonly found in video introductory videos.

Dynamic effects

Creating more weather effects will save time when you see weather information, instead of reading details like temperature and weather today, you just need to see the Effects on the application can also generalize today's weather to prepare for their work.

Update details:

1. Updated designs for iPhone 6 and iPhone 6 Plus
2. Add animation effects: thunder and dew
3. Bug fixes and performance improvements
4. Update Privacy Policy
