1. These are 12 ambitious goals that Tesla wants to complete before 2020
2. Top 5 technologies are expected to change people's lives in the future
3. Algorithms predicting human faces change over time, helping to find missing people

Using a phone or smartwatch while talking to others is considered a " *rather indecent* " act, annoying the opposite in the twenty-first century. Therefore, a team of researchers has come up with a cure with **smart glass** , which allows users to control their technology device with a " *scratching* " operation. Yes, you can **refuse a call, stop a video or switch to a song simply by swiping the nose.**
