

# You can write notes for Reels Instagram videos

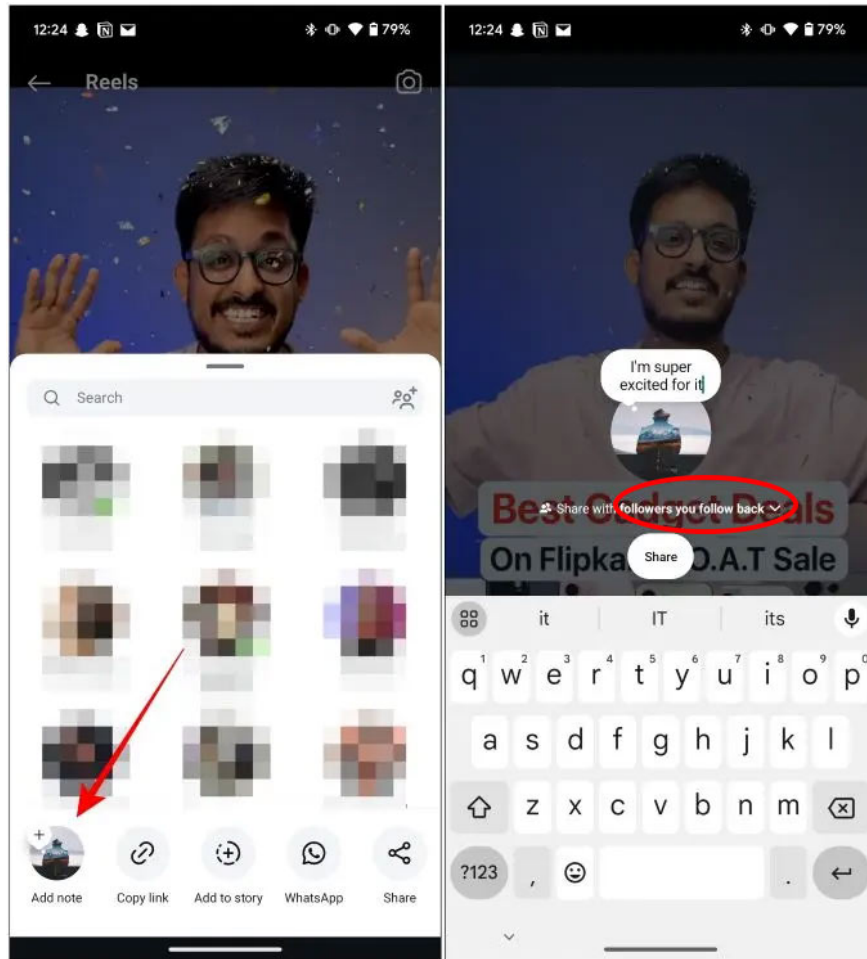

Instagram has just updated many features and will gradually roll them out to many accounts, including the note feature in Instagram Reels that you can share with others if you want.

## Instructions for writing notes in Instagram Reels

When you post a Reels video to Instagram and click **the share icon** in the right corner of the interface. will display the options interface and you will see **the Add note option** to write a shared note in Reels.

We enter notes into the Reels video as usual or tag friends' names in the note and customize who can see the note's content. Users can choose to share this Reels video note to your followers that you follow back or close friends.

Once you have selected the object to share the note with in Instagram Reels, click the Share button below to do so.

As a result, we will see the note displayed in the Reels video and only the subjects on the list you set will see the content of this note. A new Instagram feature lets you create temporary notes that disappear after three days.

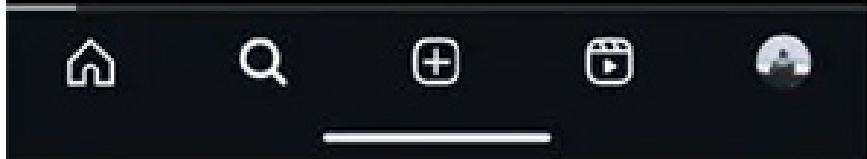

I'm super excited for it

In addition, Instagram will also allow multiple songs to be inserted into Reels with a maximum of 20 songs. You can add your favorite songs to the video, adjust the volume, display time for the songs in the video, etc. to your liking to get a completely new Reels video.

All features are currently being rolled out by Instagram to certain regions and accounts and will quickly roll out globally.
