

Your understanding of P8 computer hardware

Please read the knowledge with multiple choice questions about computer hardware below with Network Administrator.

1. Question 1. What is wrong when the computer changes HDD to SSD?
 1. The boot time is faster
 2. Shorten the time to open the program
 3. Computer noise
2. Question 2. Where is the advantage of SSD compared to HDD?
 1. The price is cheaper
 2. Better shockproof
 3. Spread less heat
3. Question 3. What is the average life of SSDs under 5 years?
 1. It's correct
 2. False
4. Question 4. Whether SSD or HDD, users should regularly defragment?
 1. It's correct
 2. False
5. Question 5. For the SSD to work well, which of the following should be done?
 1. Regularly record and delete data
 2. Leave SSD in full condition
 3. Upgrade firmware for SSD
6. Question 6. What is the abbreviated name of SSD hard drive?
 1. Solid State Drive
 2. State Solid Drive
 3. Hard Disk Drive
7. Question 7. How many types of memory chips are used most in SSDs?
 1. 1 chip
 2. 2 chips
 3. 3 chips
8. Question 8. Which SSD and HDD hard drives have a higher price?
 1. SSD
 2. HDD
9. Question 9. Which memory does the SSD use to store data?
 1. flash
 2. Metal plates are rotated by motor
 3. Another memory
10. Question 10. When did the SSD drive begin to be used in laptops?
 1. 2009
 2. 2010
 3. 2008
