

YouTube 'Training'

Are you a loyal YouTube audience? Refer to some of the tips below to master this free service.

Are you a loyal YouTube audience? Refer to some of the tips below to master this free service.

Move quickly to the "hot" scene

You want to share with everyone the exciting ball of neighbors kids through YouTube. Unfortunately, you forgot the beautiful scoring phase that only appeared in the 6th minute. Before sending the link of this video via email, you can inform people to skip the first videos to get straight to the point. specific or choose how to adjust the video to start only a few seconds before a goal? With YouTube, it is easy to adjust the start of the video by adding # t = **XXmYYs** at the end of the link, with **XX** and **YY** respectively the values ??in minutes and seconds of the scene. For example, if you want the video to start from the 5'45 'mark, add it to the end of the keyword link # t = **05m45s** .

Always watch in HD mode

Many users like to watch YouTube content in full screen mode. However, when clicking the Full Screen button, users are disappointed with the image quality because YouTube does not choose the highest resolution (HD) when playing in full screen mode. To "force" YouTube to automatically switch to HD mode, how to do it as follows:

- You login to YouTube with a separate account.
- Find your username in the upper right corner, click and select **Account** .

- Click **Playback setup** . Under **Video Playback Quality** , select **Always play HD when switching to fullscreen (when available)** and select **Save Changes** to change.

Note. Not all content can be viewed in HD resolution and you should also note that HD content playback will be difficult with a low speed connection.

"Prohibited door" related content

Many users do not like YouTube recommending related videos (**Related Video**) that appear after the end of each movie; Especially when you embed this video for other users to see. To disable these suggestions in videos you embed in your website, blog or anywhere. Do as follows:

- Open the YouTube page containing the video you need to use, click on the **Embed** button below the player.

- Uncheck the **Include related videos** item.

Copy the code in Embed and paste it where you need it.

Download the computer

Keep Tube makes it easy to download movies from YouTube to your computer.

There are many ways to download shared videos on YouTube to your computer, but one of the common utilities is **Keep Tube** . This is an add-on for Firefox, there is also another version (bookmark bar) for IE, Chrome and other popular browsers.

Besides YouTube, Keep Tube can also work with CollegeHumor, Facebook, Google Video, Metecafe and many other websites. When you view and like a movie, click the Keep Tube icon (in Firefox) or on the bookmark bar. From there, you will be redirected to the homepage of Keep Tube to be able to download videos in various formats and sizes.

According to the experience of many users, you should choose the MP4 format because this format is not only high resolution but also easy to playback on the computer. YouTube's default FLV format requires a special playback utility, while MP4 can easily be played on DivX, QuickTime or any other popular multimedia utility. Even MP4 can be viewed easily on mobile phones.
