

Zalo Beta officially set foot on the Windows platform

After a release time for all three platforms Android, IOS and Windows Phone, today VNG developer announced that Zalo has officially set foot on the Windows platform.

After a release time for all three platforms Android, IOS and Windows Phone, today VNG developer announced that Zalo has officially set foot on the Windows platform.

Zalo cho Windows

Phiên bản thử nghiệm

Ứng dụng Zalo nay đã có mặt trên PC

- ✔ Nhanh tin nhanh, ổn định
- ✔ Trò chuyện nhóm không giới hạn
- ✔ Đồng bộ tin nhắn với điện thoại
- ✔ Tương thích với Windows XP, Windows Vista, Windows 7, Windows 8

Tải về (Beta)

Lưu ý: Zalo cho PC được đăng nhập bằng cách quét mã QR từ điện thoại di động nên bạn phải tải phiên bản mới nhất Android 2.0.3 và iOS 4.2 về điện thoại. Windows Phone sẽ được hỗ trợ trong phiên bản kế tiếp.

Windows

Mac OS X (Sắp có)

Linux (Sắp có)

Zalo is a social networking site that allows you to send free messages to your friends, share your feelings, the app has a soft, flat color interface. There are also some other interesting features built into the application.

Some outstanding features on the version for Windows:

1. Fast and stable messaging.
2. Unlimited group chat.
3. Synchronize messages with the phone.
4. Compatible with *Windows XP, Windows Vista, Windows 7, Windows 8.*

Information also said the application will soon be released for Mac OS X and Linux. Right now you can download the link below and let your forum know how.

Download Zalo Beta for Windows

Note: Zalo for PC is logged by scanning QR codes from mobile phones, so you must download the latest version of Android 2.0.3 and iOS 4.2 to your phone. Windows Phone will be supported in the next version.
