

Zalo reached 4 million users

Yesterday 19/8, Vietnam Zalo application has just reached 4 million users, with more than 40 million messages exchanged daily through this free application.

Yesterday 19/8, Vietnam Zalo application has just reached 4 million users, with more than 40 million messages exchanged daily through this free application.

Along with the number of important users achieved after a year of launch, Zalo continues to release a new version with many improvements for Android and iOS devices. Voice messaging speeds increase significantly thanks to almost instantaneous data transmission, right when the recording process starts.

Application lock function on Zalo with AES encryption method helps enhance information security for users

In the new version also added **the application lock feature** to protect user privacy. Users can set 4-digit pin code to log in when opening Zalo. Messages through this application are encrypted according to AES, an advanced security standard recommended by the US National Institute of Standards and Technology.

In addition to the version on **iOS** and **Android**, a version for **Windows Phone 8** devices was also released at the end of July. Mark the support of the application on all the most popular mobile platforms today.
