Features of ZoneAlarm Free Firewall Free Version

The free version of ZoneAlarm Free Firewall offers the following features:

Protect PC over WiFi

The program tracks suspicious behavior and protects you from hackers, identity thieves and other online threats when you connect to an unsecured network.

Traffic monitoring

ZoneAlarm Free Firewall's two-way firewall monitors traffic in and out of your computer network, making it impossible for hackers to see your PC and preventing spyware from revealing your data to the Internet.

Early Boot Protection feature

With Early Boot Protection, your PC can detect if it's running a trusted operating system or a malicious rootkit, thus helping to protect it.

Protect your identity

ZoneAlarm Free Firewall helps prevent identity theft by protecting your personal data; alerts you daily of any changes (this report often indicates identity theft).

Safe search

Search the web safely and get warnings about dangerous websites before visiting them. ZoneAlarm Free Firewall's secure search engine tells you which sites are safe to visit and which should be avoided.

Anti Phishing

Protect your personal information from Phishing attacks as you browse online. Scans URLs to prevent you from entering your personal information on websites identified as containing security threats.

Safe document download

Use Zero-Day Protection to remove potentially malicious features from downloads, such as macros, embedded objects, and other malicious content.

Features of ZoneAlarm Free Firewall Paid Version

In addition to the same features as the free version, the paid version of ZoneAlarm Free Firewall has the following additional features:

Advanced access protection

Target and defeat new and advanced attacks that other firewalls miss, such as raw data access, Timing Attack, and SCM & COM.

Advanced settings control

Allows you to classify your home as private and untrusted networks as public, thus increasing the security of computers on the network and reducing potential attack vectors.

Composition control

Protection from tricks malware can use to bypass personal firewalls as it loads potentially malicious DLLs into a trusted application, bypassing application and access control free network.

Expert rule

Allows you to control and configure the firewall for maximum security.

24/7 online support

24/7 online support helps with billing issues, technical issues, and any help you may need. Knowledge centers, forums and insights are also available on the website.

No ads

Enjoy the product without ads.
