

Zotac announced the 2014 mini computer series

Manufacturer Zotac has just officially announced the new mini-computer line of micro design in Vietnam market. Accordingly, although only 13 x 13 cm in size, these computers are still fully equipped with the same features as a regular computer.

Manufacturer Zotac has just officially announced the new mini-computer line of micro design in Vietnam market. Accordingly, although only 13 x 13 cm in size, these computers are still fully equipped with the same features as a regular computer.

A series of micro computers are about the size of the Zotac book

According to *Zotac* , starting in the second quarter of 2014, Zotac will provide five new computer product categories categorized by the following characters: B, C, O, M, E. These models are geared to each consumer object is different: end users, office people, businesses, industrial projects, gamers.

Prominent in these models is the EI730 mini computer model, EI750 using high-end Intel Core I7 processor or EN760 model equipped with Nvidia GTX 860M discrete graphics card.

For example, the EI750 model is equipped with Intel Core i7 4770R 4-core processor with 3.2 GHz speed, supporting Intel HD Graphics Iris Pro 5200, 8 GB RAM. This is also the first mini PC product on the market to support connecting 3 monitors simultaneously with 2 Display Port and 1 DVI ports.

Besides, the device also has full connectivity standards such as: 2 RAM slots, 2 hard drive slots (*M-Sata and SATA*), WiFi standard AC and Bluetooth 4.0, .

With the ultra-small size mentioned above, Zotac models can be easily carried to work or replace repair parts when needed.

In Vietnam market, Zotac's microcomputer lines will be distributed through Dat Khang Technology Company.
